

Ministry of Health and Welfare
R.O.C. (Taiwan)

Introduction of Taiwan's Advanced Medical Specialties & Training Program 2023-2024

Welcome Message from Minister Jui-Yuan Hsueh of Health and Welfare

Taiwan's healthcare system, often referred to as the "Taiwan Medical Marvel," is renowned for its exceptional high accessibility and low copayment. Our nation, a leader in the realms of medicine, technology and manufacturing, is eager to extend its wealth of knowledge and experiences to the global community.

Taiwan's healthcare industry boasts top-tier doctors, cutting-edge medical technologies and the latest medical equipment. These resources not only foster specialized medical treatments and services but also lead to significant contributions to international medical research across various fields. Additionally, our hospitals frequently host global conferences and workshops, and Taiwanese doctors are sought-after speakers internationally.

Since 2002, Taiwan has been offering comprehensive clinical training programs to foreign medical professionals. Our hospitals are globally recognized for their proficiency in complex medical procedures, including organ transplants (such as liver and lung), treatments for cardiovascular disease, applications of extracorporeal membrane oxygenation (ECMO), and minimally invasive surgeries. These advanced capabilities have drawn over 2,500 medical professionals from 117 countries to our clinical training programs in the last 5 years.

To better engage with the international medical community, Taiwan has enhanced accessibility for foreign medical professionals seeking practical experiences within the country. This initiative has led to an increase in collaboration and network building among hospitals. Additionally, we offer online courses that conveniently facilitate learning about advanced medical treatments.

We believe in the value of empowering participants through education. By offering training programs and practical trainings, we equip participants with essential skills and keep them updated on the latest medical technologies, thus preparing them to tackle health challenges in their countries.

On behalf of Taiwan's Ministry of Health and Welfare, we welcome prospective participants to join our world-class clinical training programs. We look forward to you joining this network of healthcare professionals and together contributing to the health and well-being of people around the world.

Jui-yuan Hsueh

Introduction of Taiwan's Medical Specialties & Training

Outstanding Medical Performance in Taiwan

Taiwan's hospitals are outstanding internationally in terms of complicated surgeries, such as cardiovascular surgery, minimal invasive surgery, and organ transplant and more

Cardiovascular Surgery

- 4 out of the top 10 leading causes of death in Taiwan
- ✓ Bypass Graft
- ✓ AI Diagnosis
- ✓ MIS
- ✓ ...
- ✓ Catheter Ablation
- ✓ PTCA
- ✓ ECMO facilitation

Minimally Invasive Surgery (MIS)

- 40+ da Vinci Robots all over Taiwan (high density)
- ✓ Urology
- ✓ Heart
- ✓ ...
- ✓ OB&GYN
- ✓ Orthopedics

Organ Transplant

- Asia's first living donor liver transplant
- High 5-year survival rate compared to advanced countries
- ✓ Liver
- ✓ Heart
- ✓ Kidney
- ✓ Lung

Plastic Surgery

- Micro-plastic reconstruction surgery
- Every 1 in 4 Korean Plastic surgeons is trained by Taiwan
- ✓ Craniofacial reconstruction
- ✓ 100% success rate for cleft lip/palate repairing

Cancer Treatment

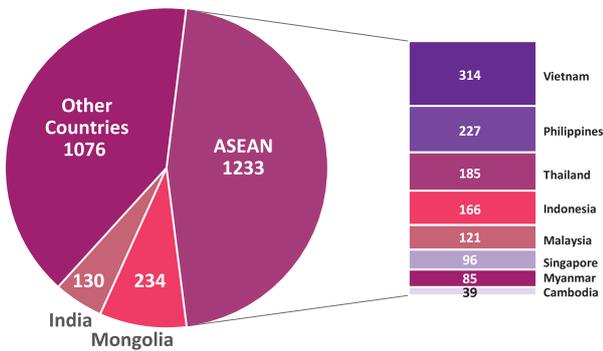

- 2 Proton Therapy Centers functioning, with the largest scale in Asia
- High 5-year survival rate (73%) compared to advanced countries
- ✓ Proton Therapy
- ✓ Stereotactic Body Radiotherapy
- ✓ Cell Therapy

Introduction of Taiwan's Medical Specialties & Training

International Medical Training

More than 2,600 overseas medical professionals came for advanced clinical skills (2017-2023.10)

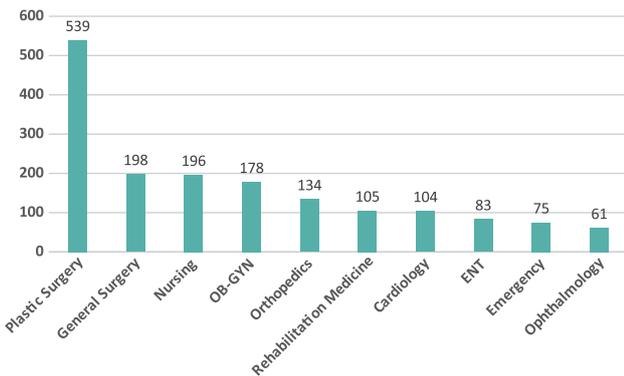

Origins of Trainees

Top 10 Training Hospitals (by Number of Trainees)

-  Linkou Chang Gung
-  National Taiwan Uni. Hospital
-  Taipei Veteran Gen. Hospital
-  China Medical Uni. Hospital
-  Kaohsiung Chang Gung
-  MoHW Taipei Hospital
-  Hualien Tzu Chi Hospital
-  Shin Kong Wu Ho Su Memorial Hospital
-  Far Eastern Memorial Hospital
-  Tri-Service General Hospital

Number of Trainees in Top 10 Most Popular Training Programs

- Other division training, including Otolaryngology, Traditional Chinese Medicine, Metabolism & Endocrinology, Anesthesiology, General Medicine, Dentistry, Pediatrics etc.

Online Courses

In response to travel restrictions during the COVID-19 pandemic, besides in-person courses, online courses are available this year, which provides a new channel to learn advanced medical treatments from Taiwan and to make connections with hospitals in Taiwan more easily.

Online Courses Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Changhua Christian Hospital	Capacity Building for Dementia Long-term Care Giver (Thai)	<1 month	Free	009
2	Changhua Christian Hospital	Diabetes Care	Available on CCH Online Courses platform	Free	010
3	Kaohsiung Medical University Hospital	Mini residency of advanced dental implant rehabilitation	1~3 months	NTD 50,000/month	011
4	National Taiwan University Hospital, Hsin-Chu Branch	Basic concepts of surgical stabilization of rib fractures	2 weeks	Upon discussion	012

Changhua Christian Hospital

Capacity Building for Dementia Long-term Care Giver (Thai)

Duration:

– Available on CCH Online Courses platform.
<https://tinyurl.com/3cn78ubw>

Program fee:

– Free

Online course:

– YouTube

Meals & other information:

– E-Certificate is available, if you watch all of the Online Courses and finish post-test & satisfaction survey.

Program Details

Study Objective

1. To build the concept of Dementia Long-term Care Innovative Model.
2. To explain the screening and evaluation tools for dementia.
3. To define the importance of family and community supporting for dementia.
4. To describe the role of Traditional Chinese Medicine and Thai Traditional and Alternative Medicine in Long-term Care.
5. To apply the management of Dementia Day Care Center.

Applicant Qualification

- Has more than three years clinical experience & more than one year working experience

Contact Point

Overseas Medical Mission Center

Name: Dr. Nina Hsiao-Ling Kao

E-mail: 138440@cch.org.tw

Tel: +886-4-723-8595 #8475

Website: <https://tinyurl.com/4h8nrfx2>

Achievements

- Brain Drain occurs most commonly in developing countries. To strengthen the clinical skills and professional knowledge of health care, CCH has been carrying out overseas medical staff training includes onsite case discussion, online courses, and study tours. The training program is customized for medical professionals with content tailored specifically to their needs.
- Those online courses cover medical diseases to long-term care with experts in different fields. Welcome to your online learning journey.
- In this series online courses, there are 8 topics, included the Dementia Care Model, Assessment Tools, Evaluation Tools, Family and Community Supporting Group, Traditional Chinese Medicine Intervention, Dementia Day Care Center and Thai Traditional and Alternative Medicine Intervention etc..

Changhua Christian Hospital

Diabetes Care

Duration:

- Available on CCH Online Courses platform.
- <https://tinyurl.com/5f8f77p2>

Program fee:

- Free

Online course:

- YouTube

Meals & other information:

- E-Certificate is available, if you watch all of the Online Courses and finish post-test & satisfaction survey.

Program Details

Study Objective

1. To build the current concept of diabetes.
2. To apply the management of diabetic complications.
3. To acquire the conception of medical nutrition therapy of diabetes.
4. To define the importance of diabetes foot care and how to practicing it.
5. To learn different strategies of management for special groups with diabetes.

Applicant Qualification

- Has more than three years clinical experience & more than one year working experience

Contact Point

Overseas Medical Mission Center

Name: Dr. Nina Hsiao-Ling Kao

E-mail: 138440@cch.org.tw

Achievements

- Brain Drain occurs most commonly in developing countries. To strengthen the clinical skills and professional knowledge of health care, CCH has been carrying out overseas medical staff training includes onsite case discussion, online courses, and study tours. The training program is customized for medical professionals with content tailored specifically to their needs.
- Those online courses cover medical diseases to long-term care with experts in different fields. Welcome to your online learning journey.
- Diabetes is a serious, long-term condition that occurs when the body cannot produce any or enough insulin or cannot effectively use the insulin it produces. And it is becoming more and more serious all over the world. The prevalence has been rapidly rising especially in low- and middle-income countries than in high-income countries. Also, Diabetes is a major cause of blindness, kidney failure, heart attacks, stroke and lower limb amputation.
- Here are specialists of Endocrinology and Metabolism from Changhua Christian Hospital (CCH) as the speaker of CCH Online Courses for Diabetes Care, talking about the current issues about DM and sharing their clinical experience with you.

Kaohsiung Medical University Hospital

Mini residency of advanced dental implant rehabilitation

Dental implantation is the modern method to rehabilitate the edentulous jaw condition. An ideal dental implant requires evidenced knowledge and practical skills.

Dental department of Kaohsiung medical university is the best model of multidisciplinary team approach. The prosthetic driven concept lead the long term implant success. Therefore, the core of our team of dental implant included the prosthodontic specialists, periodontal specialists and oral maxillofacial surgery specialists.

Duration:
– 1~3 months, 15 persons

Program fee:
– NTD 50,000/month

Online course:
– Using Cisco Webex for online course

Program Details

Study Objective

1. Prosthetic driven concept.
2. Contemporary implant surgical protocol.
3. Contemporary implant prosthesis concept.
4. Understanding various implant design.
5. Multidisciplinary team approach via digital workflow.

Online learning topics

1. Modern implant protocol
2. Digital workflow.
3. Ideal implant position and distributions.

Applicant Qualification

- Must have more than 3 years general dental practice experiences & more than 5 dental implant placement experience

Contact Point

Dental department

Name: Je-Kang Du
E-mail: dujekang@gmail.com
Name: Yu-Feng Chen
Email: omsyfchen@gmail.com
Tel: +886-7-3121101-7016

Achievements

- In our team we perform around 800 dental implantation procedure per year. More than 60 sinus lift surgery include crestal approach and open window lateral approach; more than 150 vertical and horizontal ridge augmentation per year. The implant success rate reached 96%.
- The research team published many academic research articles included: dynamic navigation, static guided stent, ISQ for initial stability of dental implant.
- We have trained more than 30 surgeons from all over the world.

National Taiwan University Hospital, Hsin-Chu Branch

Basic concepts of surgical stabilization of rib fractures

The Rib Repair Team is a multidisciplinary team. We used surgical stabilization of rib fractures (SSRF) for patients with complex chest wall injuries or polytraumatized patients with concomitant flail chest.

Duration:

– Course: 2 weeks/3 person

Program fee:

– Upon discussion

Online course:

– Using Cisco Webex for online course

Program Details

Study Objective

1. Biomechanical properties of rib-specific implants.
2. Surgical approaches for SSRF
3. Optimal timing and candidate for SSRF.

Online learning topics

1. Surgical stabilization of rib fractures.

Applicant Qualification

- Surgical stabilization of rib fractures.

Contact Point

Center for International Health

Name: Ms. Lee Tai Jen

E-mail: g04890@hch.gov.tw

Tel: +886-3-5205604#8883

Website: <https://www.hch.gov.tw/english/>

Achievements:

- We have conducted more than 300 cases of SSRF. The mortality rate of SSRF is 1 % and is comparable to the outcomes from other level 3 trauma centers from the US or European centers. The ICU and hospital length of stays are shortened after application of SSRF.
- We have published 6 articles of SSRF and has participated in two international research programs.

Cardiovascular Treatment

Cardiac surgeons at Taiwan's hospital are superior at heart transplantation and other cardiovascular surgeries. Statistically, Taiwan performs more than 5,000 cardiac diagnostics and treatment procedures per year, including 100 heart transplantation cases, numerous CABG, valve replacement, cardiac catheterization, stent cases and etc.

The success rate of coronary artery stent implantation is up to 99% in Taiwan. Besides, Taiwan also established the first team in the world to perform auto-heart transplantation surgeries. Medical professionals in Taiwan also have abundant experience in radiofrequency catheter ablation treatment for arrhythmia, coronary artery disease treatment, percutaneous coronary intervention (PCI) and cardiovascular health examination.

Cardiovascular Treatment Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	MacKay Memorial Hospital	Heart Failure and Telemedicine Program	< 1 months; 3 months ~1 year	NTD 10,000-20,000/month	015
2	Cathay General Hospital	Cardiovascular Center Program	1~3 months	NTD 20,000/month	016
3	Tri-Service General Hospital	Tri-Service General Hospital HeartMate-3 Ventricular Assist Device Program	< 1 month; 1-2months	NTD 5,000/month	017
4	Far Eastern Memorial Hospital	Cardiovascular Surgery	1-3months	NTD 30,000/month	018
5	Cheng Hsin General Hospital	Mitral Valve Repair Training Program	< 1 week	NTD 30,000-50,000/day	019
6	Cheng Hsin General Hospital	Transcatheter Heart Valve Intervention Program	1 week - 1 month	NTD 6,000-15,000/day	020
7	Tainan Municipal An-Nan Hospital - China Medical University	Peripheral Endovascular Training Course	< 1 month; 3~12 months	NTD 35,000/month	021
8	Taichung Veterans General Hospital	Clinical Cardiovascular Interventional Therapy Program	1~3 months	NTD 1,500 / Administration fee	022

MacKay Memorial Hospital

Heart Failure and Telemedicine Program

The Heart Failure Team, established in February 2017, is a multidisciplinary team aiming for precise and early diagnosis of HF phenotypes, imaging survey, and subsequent treatment referral. We have accomplished animal studies and clinical trials, and also have attended several domestic quality care competitions in Taiwan.

Duration:

- Course 1: < 1 months, 2 person
- Course 2: 3 months ~1 year, 2 person

Accommodation:

- Additional fee, NTD 1200 / Day(Hotel)
- -by TIHTC fee, NTD 5000-Mouth (Dorm) depend on room capacity

Program fee:

- Program fee:
- NTD 10,000-20,000/month

Program Details

Study Objective

1. HF diagnosis and criteria for objective HF phenotyping;
2. Accurate imaging diagnosis and techniques in clinical staging or differential diagnosis of HF;
3. Optimal guideline-directed pharmacological HF therapy.

Related Skills / Surgical Technique

1. Interpretation of HF phenotypes by echocardiography/MRI
2. Accurate HF phenotyping
3. Basic HF clinical care (ward care).

Applicant Qualification

- More than 3 years of clinical experiences & more than 1 year of working experience in HF.
- Knowledge and skills in data processing and manuscript preparation and writing

Contact Point

Cardiovascular Center

Name: Ms. Hsieh

E-mail: sandy1028.f824@mmh.org.tw

Tel: +886-2-5433535*3446 / +886-905960382

Achievements

- We have conducted several clinical trials (including the Asian HF registry) and research programs in this field and care programs.
- Our research team also has a lot of discoveries and publications in HF and imaging diagnosis, along with risk factor modification and early detection.
- We have collaborated with researchers and physicians from all over the world.

Cathay General Hospital

Cardiovascular Center Program

Our cardiology and surgical teams share resources such as hybrid operating rooms, examination rooms, intensive care units...etc. The team provides patients with comprehensive and featured medical services. The new Hybrid OR, the integration of the Artis Zeego 3D imaging and intra-operative navigation system enable physicians to perform imaging, minimally invasive surgery or traditional video-guided therapy in the same operating room. Immediate postoperative assessment will be conducted. The entire process reduces the risk of multiple shifts between imaging examination room and operating room which increases the success rate of the operation.

**Duration:**

- 1~3 months/ 2 trainees

**Program fee:**

- NTD 20,000/month

**Accommodation:**

- Included in the program fee
- Serve lunch and dinner boxes

Program Details

Study Objective

1. Coronary artery bypass
2. Valve valence surgery
3. Acute aortic dissection surgery
4. Transcatheter interventions (including transcatheter aortic valve stenosis replacement, transcatheter atrial septal defect repair, etc.)
5. Catheter ablation of cardiac arrhythmias

Applicant Qualification

- Local medical license is required

Contact Point

Medical Development

Name: Ms. Ting

E-mail: hm@cgh.org.tw

Tel: +886-2-2325-7500 Ext.1252

Further information: <https://en.cgh.org.tw>

Achievements

- Open heart surgery over 9,000 cases.
- Cardiac catheterizations and interventional cardiology treatments over 35,000 cases.
- Implantation of pacemaker, automatic defibrillators and cardiac resynchronization therapy over 2,600 cases.
- Success rate of coronary artery bypass surgery: 97%
- Success rate of valve valence surgery: 97%
- Success rate of Acute aortic dissection surgery: 90%
- Door- To-Balloon time for acute myocardial infarction within 90mins: success rate over 90%.

Tri-Service General Hospital

HeartMate-3 Ventricular Assist Device Program

Our mechanical circulatory support team is a multidisciplinary team. Our team includes expert cardiac surgeons, professional perfusionist, experienced operation scrub nurses and full-time coordinators. We have the largest case number of HeartMate-3 ventricular assist device in Taiwan. Our ex-superintendent, Professor Chien-Sung Tsai, is the only proctor in Taiwan, and approved by the Abbott Medical Taiwan Company.

Duration:

- Course 1: < 1 month, 2 persons
- Course 2: 1-2 months, 2 persons

Accommodation:

- Additional fee of dorm room
- NTD 3000 / month

Program fee:

- NTD 5,000/ month

Meals & other information:

- Permission to use staff cafeteria
- Permission to observe other cardiac and vascular surgery for free
- Permission to attend all meeting conference for free

Program Details

Study Objective

1. Patient selection
2. Pre-operative surgical technique
3. Troubleshooting of weaning CPB
4. Post-implantation ICU care
5. Anti-coagulation management

Surgical technique

1. Apical cannulation
2. HeartMate-3 position
3. Driveline tunneling
4. Aortic anastomosis
5. Adequate de-airing
6. Weaning CPB with concomitant HeartMate-3 support

Troubleshooting of weaning CPB

1. Peri-operative TEE interpretation
2. Treatment of RV failure
3. Hemodynamic management with inotropes and vasopressor

Applicant Qualification

- Having experiences of cardiac surgeon for more than 3 years
- Having more than 20 cases of cardiac surgery with cardiopulmonary bypass
- Having the basic concept of mechanical circulatory support, such as extracorporeal membrane oxygenation, cardio-pulmonary bypass, and ventricular assist device.

Contact Point

Division of Cardiovascular Surgery

Name: Dr. Po-Shun Hsu

E-mail: hsuposhun@gmail.com

Tel: +886-2-8792-7212

Achievements

- We had conducted 10 cases of s HeartMate-3 Ventricular Assist Device implantation and had 100% surgical survival rate and 90 % hospital discharge rate, which is comparable to the medical heart center in the United State. Our coordinators will follow up these patients closely, no matter the patient has bridge to heart transplantation or is on destination therapy.
- In the clinical field, our team also has a lot of publications about mechanical circulatory support. We also have a lot of researches and publications in the basic research, such as hemorheology, cardiac electrophysiology, vascular pathology, and immune physiology.
- Professor Chien-Sung Tsai has been invited to Japan for oversea teaching and lessoning of the surgical techniques.

Far Eastern Memorial Hospital

Cardiovascular Surgery

We have performed more than eight-thousand cardiac operations, including CABG, valve surgery, and heart transplants. The core competencies of our team at FEMH are off-pump coronary artery bypass (OPCAB) and minimally invasive cardiac surgery (MICS). More than 85% of the isolated CABG procedures performed were OPCAB. More than 90% of valve procedures are performed via the sternum-sparing approach (MICS). Currently, more than 50% CABG is sternum-sparing. Also, FEMH is considered a leader in endoscopic vessel harvest (EVH) procedures and has been the premier training center in Asia. More than hundred foreign cardiac surgeons have been to FEMH for EVH and MICS training.

Duration:
– Short-term(1-3months)

Program fee:
– NTD 30,000/month

Accommodation:
– Additional fee, NTD 2,000/week(dorm)

Meals & other information:
– Not Included

Program Details

Study Objective

Minimally Invasive surgery techniques

Skills

Minimally Invasive Cardiac Surgery (MICS)

Applicant Qualification

- We will assess applicant's profile

Contact Point

Strategy Planning Department

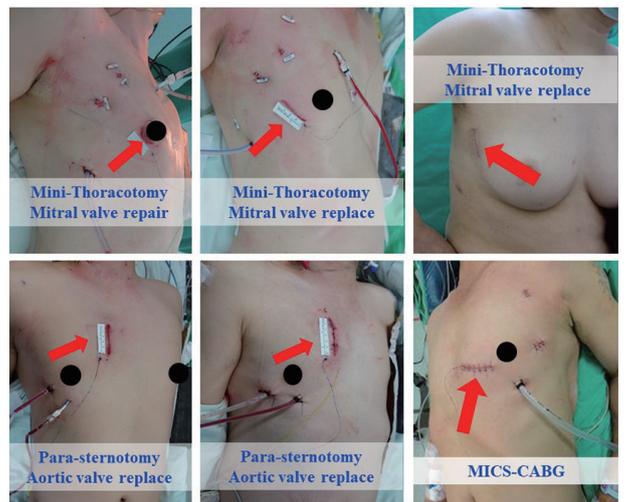

Name: Ms. Huang

E-mail: planfemh@gmail.com

Tel: +886-2-77281018

Achievements

- We received I.B.M.I "National Innovation" Prize, "SNQ" Symbol of National Quality, "CAD Care Certification", "Heart Failure Care Certification"

Cheng Hsin General Hospital

Mitral Valve Repair Training Program

The Heart Center of Cheng Hsin General Hospital was established in 1994 and led by Professor Jeng Wei. Our team is proud of having a strong heart team of cardiac surgeons and cardiologists, and sparing no efforts to improve the quality of medical services and to develop the level of the professional competences. Over the past two decades, we have been putting into resources to upgrade surgical and medical equipment and dedicated to provide sophisticated, highly-effective techniques and treatments, including the mitral valve repair.

Duration:

- Course 1: <1week/8 persons
- Course 2: <1 week/person

Program fee:

- 2-day course(1 cardiac surgeon, echocardiographer, perfusionist, anesthesiologist): NTD 100,000/day
- Individual (cardiac surgeon) NTD 50,000/ day
- Individual (echocardiographer or perfusionist or anesthesiologist): 30,000/day.
- 7-day course(heart team of 4 members): NTD 500,000/ week

Accommodation:

- Other: Excluded

Meals & other information:

- Dining: Offering lunch

Program Details

Study Objective

1. Heart team approach, including cardiac surgeon, cardiologist, echocardiographer, anesthesiologist, pulmonologist and physical rehabilitation specialist.
2. Pre-operative evaluation and planning.
3. Surgical techniques for mitral valve repair.
4. Post-operative care and follow-up

Related Skills / Surgical Technique

1. Heart team approach for mitral valve repair.
2. Pre-operative evaluation and planning.
3. Surgical techniques for mitral valve repair.

Applicant Qualification

- Additional fee, new comers or experienced are welcomed. For surgeon, we recommend he or she has operated more than 30 cases of conventional cardiac surgery.
- We encourage the applicants to apply as heart team.

Contact Point

Telehealth and International Medical Services Center

Name: Ms. Lin

E-mail: chf107141@chgh.org.tw

Tel: +886-2-2826-4400#3449

Achievements

- We have performed more than 200 cases of mitral valve surgery every year and about 1200 cases of mitral valve surgery in recent 5 years.
- Our research team has published extensively in the fields of cardiac surgery, heart transplantation, heart failure, coronary artery disease, and echocardiography. More than 200 publications have been published in peer-reviewed high-ranking SCI journals.
- We are experience in training different aspects of cardiac surgery and cardiology. There are more than 100 surgeons, cardiologist, technicians, and nurses all over the world have undergone our training courses so far.

Cheng Hsin General Hospital

Transcatheter Heart Valve Intervention Program

The Heart Center of Cheng Hsin General Hospital was established in 1994 and led by Professor Jeng Wei. Our team is proud of having a strong heart team of cardiac surgeons and cardiologists, sparing no efforts to improve the quality of medical services and to develop the level of the professional competences. Over the past two decades, we have been putting into resources to upgrade surgical and medical equipment and dedicated to provide sophisticated, highly-effective techniques and treatments, including the transcatheter heart valve interventions.

Duration:

- Basic course 1: <1 week / 5-10 persons
- Basic course 2: <1 month/person
- Advanced course 1: <1 week / 5-10 persons
- Advanced course 2: <1 month/person

Program fee:

- Basic course (physicians): NTD 15,000/day
- Basic course (paramedics): NTD 10,000/day
- Advanced course (physicians): NTD 10,000/day
- Advanced course (paramedics): NTD 6,000/day

Accommodation:

- Other: Excluded

Meals & other information:

- Dining: Offering lunch

Program Details

Study Objective

1. Heart team approach, including patient selection and screening
2. Pre-procedural planning, including device selection and sizing, etc.
3. Vascular access: Transfemoral and alternative accesses
4. TAVR, MitraClip, and other transcatheter procedures
5. Intra-operative monitoring
6. Trouble-shooting and management of complications
7. Post-operative care and follow-up

Related Skills / Surgical Technique

1. Heart team approach for THVI
2. Transfemoral and/or transapical TAVR procedures with balloon-expandable (Edwards Sapien 3) and/or self-expanding (Medtronic Evolut-R or Abbott Portico) devices
3. Transfemoral MitraClip (Abbott) procedure
4. Trouble-shooting and management of complications

Contact Point

Telehealth and International Medical Services Center

Name: Ms. Lin

E-mail: chf107141@chgh.org.tw

Tel: +886-2-2826-4400#3449

Achievements

- Transcatheter aortic valve replacement (TAVR) was introduced in Taiwan in 2012. Nowadays, our team has performed more than 800 cases of transcatheter heart valve interventions (THVI), including TAVR, MitraClip, etc., in addition to conventional valve surgeries and has become one of the largest THVI centers in Asia. In general, the procedural success rate at our institution is > 98%.
- Our research team has published extensively in the fields of transcatheter heart valve interventions, cardiac surgery, heart failure, coronary artery disease, and echocardiography. More than 200 publications have been published in peer-reviewed high-ranking SCI journals.
- We have trained more than 100 surgeons, cardiologist, technicians, and nurses all over the world.

Applicant Qualification

- Additional fee, different programs (basic and advanced course) to meet the needs of applicants are provided.
- New comers or experienced implanters are welcomed.
- We encourage the applicants to apply as heart teams.

Tainan Municipal An-Nan Hospital - China Medical University

Peripheral Endovascular Training Course

Cardio-vascular Surgery Team has been established since 2013/3/1. All members of CVS Team have been regularly invited to foreign country for experience sharing and academic communication. We aim at establishing World-class Vascular access Center and is proud to be the leading model for excellent Vascular Center in Asia Pacific.

Duration:

- Course 1: < 1 month/ 1 person
- Course 2: 3~12 months/ 2 person

Accommodation:

- Additional fee, NTD 3,000 / month

Program fee:

- Course: NTD 35,000/ month

Program Details

Study Objective

1. Venous Intervention
2. Aortic Intervention
3. AV access creation and Intervention
4. Peripheral artery intervention

Related Skills / Surgical Technique

1. Complex Aortic Intervention
2. Peripheral artery intervention (Lower extremities)
3. Venous and AV access intervention

Applicant Qualification

- Has more than 1 year clinical experiences & more than 1 year working experience
- Applicant's profile will be assessed

Contact Point

International Patient Service Center

Name: Ching-Yi, Shao

E-mail: 070283@tool.caumed.org.tw

Tel: +886-6-3553111 #1115

Achievements

- CVS Team have involved in peripheral vessel intervention, dysfunction AV access intervention, carotid and aortic intervention, peripheral artery and advanced cardiac surgery and achieved enormous clinical experience and good clinical results.
- The team had many experience in AV access intervention, including central vein and cephalic arch together with tertiary AV access creation. The team also had leading experience in deep venous intervention
- We have trained more than 6 surgeons and interventional nephrologist from all over the world.

Taichung Veterans General Hospital

Clinical Cardiovascular Interventional Therapy Program

The Interventional Division of the Cardiovascular Center of Taichung Veterans General Hospital (TCVGH), led by Professors Yun-Chin Fu and Wen-Liang Lee, is a multidisciplinary team that comprises 10 highly-experienced interventional cardiology specialists. We provide the up-to-date diagnosis and treatment for all structural and vascular diseases of cardiovascular system. Our high patient volume and considerable disease complexity make us the influential leader in the central Taiwan.

Duration:

– Course: 1~3 months, 4 persons

Accommodation:

– Free, limited space for accommodation.

Program fee:

– NTD 1,500 /Administration fee

Meals & other information:

– No

Program Details

Study Objective

1. Differential diagnosis, patient selection, and preoperative planning
2. Interventional techniques
3. Postoperative care and rehabilitation program

Related Skills / Surgical Technique

1. Coronary interventions for CHIP, CTO, ACS cases.
2. Peripheral arterial and venous interventions.
3. Interventions for valvular heart disease- TAVI, Mitraclip, PTMC, PTAV, BAV.
4. Interventions for congenital heart diseases- ASD, VSD, PDA transcatheter closure.

Applicant Qualification

- Physician

Tel: +886-4-2359-2525 ext.3124

Achievements

- For coronary artery disease, we treat averagely 1,500 patients per year, many of whom were Complex high-risk indicated patients (CHIP), Acute Coronary Syndrome (ACS), Chronic Total Occlusion (CTO), and calcified or high Syntax score cases, by percutaneous coronary interventions—pioneering techniques, therapeutic devices and imaging systems—with excellent patient outcome above international standards.
- For peripheral vascular disease, we treat averagely 200 patients yearly, including those with acute and chronic arterial/venous/pulmonary arterial diseases by innovative atherectomy and thrombectomy devices. The limb salvage rate for critically ischemic limbs is above 80% in our center.
- For adult structural heart disease, we have successfully completed nearly 100 Transcatheter Aortic Valve Implantation (TAVI) cases and 30 MitraClip cases within the past 2 years. Interventional specialists of our center are also skillful in Percutaneous Transvenous Mitral Commissurotomy (PTMC), Percutaneous Transluminal Pulmonary Valvuloplasty (PTPV) and Percutaneous Balloon Aortic Valvuloplasty (BAV) for management of diverse valvular heart diseases.
- For congenital heart disease, our pediatric cardiologist Professor Fu is the pioneer in transcatheter treatment of the most complicated Atrial Septal Defect (ASD), Ventricular Septal Defect (VSD), Patent Ductus Arteriosus (PDA) as well as Pulmonary Stenosis (PS) and Aortic stenosis (AS) in the Asian-Pacific region. Our adult cardiologist can also treat congenital heart diseases by interventional techniques based on patient conditions.

Gynecology & Obstetrics

The success pregnancy rate is up to 37.7% and the live birth rate is 27.7% in Taiwan. Taiwan also provides many reproductive techniques including artificial insemination, IVF-ET, ICSI, blastocyst transfer and pre-implantation genetic diagnosis, along with infertility counseling.

Gynecology & Obstetrics Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Changhua Christian Hospital	Reproductive Medicine	1-6 months	USD 100/ week	025
2	Dalin Tzu Chi Hospital	Urogynecology and Endoscopic surgery	< 1 month; 3 months ~1 year	upon discussion	026
3	Taipei Veterans General Hospital	Minimal Invasive Gynecologic Surgery Urogynecologic Surgery Training Program	6 months; 1 year	Attending: NTD 30,000/ month Resident: NTD 10,000/ month	027
4	E-DA Hospital	Laparo-endoscopic Single-site Surgery and Hysteroscopic Surgery	< 6 months; 1 year	Upon discussion	028
5	Taipei Medical University - Shuang Ho Hospital, Ministry of Health and Welfare	da Vinci Surgical System Training Program	< 1 months; 3 months ~1 year	NTD 15,000/ day	029

Changhua Christian Hospital

Reproductive Medicine

CCH's Reproductive Medicine Center is the in-vitro fertilization (IVF) institution granted with Symbol of National Quality and accredited by the College of American Pathologists (CAP). The multi-disciplinary comprehensive infertility treatment is performed by the professional, quality medical research team led by Prof. Horng-Der Tsai, former President of the Taiwan Association of Obstetrics and Gynecology.

Duration:
– 1 month-6 months

Program fee:
– USD \$ 100/week

Accommodation:
– Excluded in training fee
– Available to assist dormitory or hotel arrangement

Meals & other information
– Transportation: Available to assist airport pick up service
– Meals: -Excluded in training fee

Program Details

Study Objective

1. IUI
2. IVF-ET
3. GIFT
4. TET
5. ICSI

Related Skills / Surgical Technique

1. ICSI, Intracytoplasmic sperm injection
2. PESA, Percutaneous Epididymal sperm Aspiration

Applicant Qualification

- Has more than three years clinical experience & more than one year working experience

Contact Point

Overseas Medical Mission Center

Name: Dr. Nina Hsiao-Ling Kao

E-mail: 138440@cch.org.tw

Tel: +886-4-723-8595 #8475

Website: <https://tinyurl.com/4h8nrfx2>

Achievements

- The high IVF pregnancy rate of 50% in CCH surpassed worldwide standards; moreover, with support from the Center for Medical Genetics certified by Symbol of National Quality and CAP, the team assists infertile couples to have their outstanding babies.

Dalín Tzu Chi Hospital

Urogynecology and Endoscopic surgery

**Duration:**

- Course 1: < 1 months, 2 person
- Course 2: 3 months ~1 year, 2 person

**Program fee:**

- The program fee is upon discussion

**Accommodation:**

- Additional fee, Suite: NTD 700/day
- Twin room: NTD 1,000/month

**Meals & other information**

- Cafeteria provides vegetarian meals
- English, Chinese taught

Program Details

Study Objective

1. Understand the pathophysiology of Pelvic Organ Prolapse (POP) and learn these correctional surgery.
2. Learn the urinary incontinence surgery
3. Learn the role of Video Urodynamic Study (VUDS) in diagnosing the LUTS and interpreting the results.
4. Improving skills in minimal invasive surgery

Related Skills / Surgical Technique

1. Laparoscopic sacrocolpopexy or sacrohysteropexy
2. Stress urinary incontinence surgery (TVT - retropubic approach or trans-obturator approach or single incision sling surgery)
3. Natural Orifices Transluminal Endoscopic Surgery (NOTES) – hysterectomy etc

Applicant Qualification

- A gynecology attending physician who had experiences at least 2 years

Contact Point

International Medical Service Center

E-mail: dlimsc@tzuchi.com.tw

Tel: +886-5-2648000 ext.1234

<https://dalín.tzuchi.com.tw>

NO. 2, Min-Sheng Road. Dalín Town, Chiayi County, Taiwan, R.O.C.

Achievements

- The Department of Obstetrics and Gynecology has established a subspecialty of urogynecology and endoscopy for more than three years. We perform approximately 80 pelvic reconstruction operations, 70 urinary incontinence operations, 100 laparoscopic hysterectomy operations, and 230 surgical laparoscopic surgeries a year. Among them, there have been more than 100 cases of natural orifice transluminal endoscopic surgery (NOTES)(until Aug 2021).
- We have also published several papers on pelvic reconstruction surgery and laparoscopic surgery.

Taipei Veterans General Hospital

Minimal Invasive Gynecologic Surgery Urogynecologic Surgery Training Program

Duration:

- Course A: 6 months, 1-2 person
- Course B: 1 years, 1-2 person

Program fee:

- Attending: 30000NT/month
- Resident: 10000NT/month

Accommodation:

- Shared room 3,400 NT/month.
- Single room 500 NT/day. Offering lunch if participate in operation.

Program Details

Study Objective

1. Minimal invasive gynecologic surgery
 - Setting of laparoscopic/ hysteroscopic/robotic surgery.
 - Training technique of minimal invasive surgery (Laparoscopy /Hysteroscopy/Robotic).
 - Management of surgical related complications in minimal invasive surgeries.
 - Participation of evidence based conference, clinical research and paper publication.
2. Urogynecologic surgery
 - Evaluation of urogynecologic disease.
 - Training technique of urogynecologic surgery
 - Management of surgical related complications in urogynecologic surgeries.

Applicant Qualification

- Fellow or Attending doctor of Gynecology.

Others:

- Valid Physician/Medical License.
- Valid specialized License of OBGYN.

Contact Point

Department of Obstetrics and Gynecology

Tel: (886)- 2-28757566

Minimal Invasive surgery training program:

Name: Ms. Ling Yu Chang (Attending)

Email: lychiang2@vghtpe.gov.tw

Email: chenyj@vghtpe.gov.tw

Urogynecologic surgery training program:

Name: Mr. Huann-Cheng Horng (Attending)

Email: hchorng@vghtpe.gov.tw

Achievements

Minimal invasive gynecologic surgery training program

- APAGE accreditation center in Minimal Invasive Gynecology (ACMIG) since 2018.
- Performed Robotic surgery over 200 cases in last decade, including robotic staging surgery, cystectomy, oophorectomy, assisted myomectomy, total hysterectomy, and sacrocolpopexy.
- Performed laparoscopic surgery over 900 cases in last year (2019), containing single-port and NOTES in benign and malignancy surgeries.
- Performed hysteroscopic surgery over 250 cases in last year (2019).

Urogynecologic surgery training program

- Performed urogynecologic surgery over 200 cases in last year (2019), such as VPUS, Lefort colpocleisis, pelvic reconstruction surgery.

E-DA Hospital

Laparo-endoscopic Single-site Surgery and Hysteroscopic Surgery

The Gynecologic Minimal Invasive Surgery Team got the APAGE certification of international training center in 2016.

**Duration:**

- Course 1: < 6 months/ 2 person
- Course 2: 1 year/ 2 person

**Program fee:**

- The program fee is upon discussion

**Accommodation:**

- Additional fee, NTD 160/day

Program Details

Study Objective

1. The setting of laparoscopic surgery.
2. The setting of hysteroscopic surgery.
3. Laparoscopic surgical technique.
4. Hysteroscopic surgical technique.

Related Skills / Surgical Technique

1. Total hysterectomy
2. Myomectomy
3. Subtotal hysterectomy

Applicant Qualification

- Residents or Attending of Gynecology surgery

Achievements

- We had performed over 2000 cases of laparo-endoscopic single-site surgeries since 2011.

Academic Research:

- Chang Y, Kay N, Huang MR, Huang SJ, Tsai EM. Laparoendoscopic Single-Site Supracervical Hysterectomy with Manual Morcellation: A Retrospective Study. J Minim Invasive Gynecol. 2018;25:1094-1100.

Training Experience:

- We have trained 6 surgeons from all over the world.

Taipei Medical University - Shuang Ho Hospital, Ministry of Health and Welfare

da Vinci Surgical System Training Program

We are pioneers of robotic GYN surgery in Taiwan. An iconic robotic surgery team in Asia. The only case observation center in Taiwan.

Duration:

- Short-time training: < 1 month/ person
- Long-time training: 3 months ~1 year/ 2 person

Program fee:

- Course: NTD 15,000/day

Accommodation:

- Other: can assist to arrange.

Program Details

Study Objective

1. Team management
2. Pre-OP assessment and preparation
3. Operation skills
4. Post-OP care

Related Skills / Surgical Technique

1. Communication
2. Simulator
3. Case observation

Applicant Qualification

- Complete residency training.
- More than 1 year of clinical working experience.
- Laparoscopy experience

Information

Neurosurgery & Neurology

The surgery survival rate is higher than 99% in Taiwan, and only 2.6% cases suffered from recoverable complications, whilst no patients had permanent neural damage.

Besides, many hospitals in Taiwan have Symbol of National Quality (SNQ) certificate of their navigation surgery system or surgery platform, which guarantee the safety and quality of the operation room. Some hospitals in Taiwan even have cutting-edge technology which applied virtual reality (VR) in neurosurgery training.

Neurosurgery & Neurology Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Cathay General Hospital	Neurosurgery training program	1~3 months	NTD 20,000/month	033
2	Kaohsiung Municipal Ta-Tung Hospital	System and management for dementia	< 1 month; 3 months ~1 year	NTD 10,000/month	034
3	Kaohsiung Medical University Hospital	Neurocritical care training Program	3 ~ 6 months	NTD 30,000/month	035
4	Kaohsiung Veterans General Hospital	Carotid ultrasonography Training Program	1-2 months	Free	036

Cathay General Hospital

Neurosurgery training program

There are over 1,200 cases of spinal surgery performed annually at Cathay General Hospital. These cases consisted of 300 cases of cervical, 800 of lumbar spine surgery, and other spine surgeries such as spinal tumor and AVM.

Annually there are around 40 cases of cerebrovascular surgeries and 60 cases of interventional neuroradiology. Acute stroke treatment, which becomes popular worldwide in recent years, is part of our main training curriculum. We use hybrid OR to approach cerebrovascular diseases such approach is a cutting edge technique in the neurosurgical field.

Our hospital is one of the tertiary traumatic care centers in Taipei. There are around 20 monthly cases of neurotrauma. Comprehensive traumatic care and operation would be the main curriculum. Neurocritical care in the ICU is another main training subject.

Duration:

– 1~3 months/3 trainees

Accommodation:

- • Included in the program fee
- • Serve lunch and dinner boxes

Program fee:

– Course: NTD 20,000/month

Program Details

Study Objective

1. Spine surgery/ ACDF, ADR, Laminoplasty, Laminectomy with instrument, lateral mass screws, pedicle screws. Spinal tumor, AVM, Minimally invasive surgery, endoscope surgery, radiofrequency
2. Aneurysm clipping/coiling, AVM surgery/ embolization, IA thrombectomy for acute stroke, balloon angioplasty/Stenting for intracranial arterial stenosis, Cerebrovascular bypass surgery
3. Neurocritical care in ICU, Surgery for traumatic brain injury

Applicant Qualification

- Spinal surgery, well training is better
- Cerebrovascular surgery or Interventional neuroradiology
- Neurotraumatology

Achievements

- We are one of the few neurosurgery specialist training centers in Taiwan.
- Listed by Newsweek 2023 as one of the Best Specialty Hospital in Asia.

Kaohsiung Municipal Ta-Tung Hospital

System and management for dementia

Duration:

- Course 1: 2 weeks, 2 persons
- Course 2: 3 months ~1 year, 2 persons

Program fee:

- NTD 10,000/month

Accommodation:

- None

Program Details

Study Objective

How to conduct dementia related study and research

2. identify very mild stage dementia
3. precise medicine for dementia

Related Skills / Surgical Technique

1. How to grading dementia stage
2. Establish a cohort for AD, MCI, and ACS
3. Quantify EEG

Applicant Qualification

- Certificated Neurologist interested in dementia research

Achievements

- For a decade, the Memory & Aging Center (MAC) has excelled in Early Screening for Dementia and Individualized Treatment, driven by our expertise in integrating artificial intelligence and clinical data. We've established a prominent Alzheimer's disease cohort and pioneered Personalized Precision Medicine in Dementia.
- Our site hosts diverse cohorts, including Alzheimer's dementia (AD), mild cognitive impairment, adult children of AD patients, and over 2000 healthy controls, serving as the foundation for our cutting-edge research.
- We've developed AI algorithms and devices for dementia management, extending their benefits to the community. Our annual publication of over 10 manuscripts and patents in dementia-related disorders reflects our commitment to practical impact.
- MAC's global reach encompasses MOUs with multiple Asian universities, fostering research collaborations across 9 countries, amplifying our mission to advance memory and aging-related conditions worldwide.

Kaohsiung Medical University Hospital

Cancer Therapy: Comprehensive Innovation Therapy of Precision Medicine in Rectal Cancer Patients

Our division of colorectal surgery, established on August 2016, is a multidisciplinary team. We provided a comprehensive therapy for rectal cancer patients to preserve anus in Taiwan.

Duration:

- Course 1: 1 day, 3 persons
- Course 2: 2 days, 3 persons

Accommodation:

- None

Program fee:

- Course 1: 500USD per person
- Course 2: 800 USD per person

Meals & other information:

- Offering lunch

Program Details

Study Objective

1. Strategy-making of perioperative concurrent chemotherapy
2. Technique of Da vinci robotic rectal cancer surgery.
3. Assessment and supplement of perioperative nutrition for cancer patients.

Related Skills / Surgical Technique

1. Robotic total mesorectal excision
2. Intersphincteric dissection

Applicant Qualification

- has more than 3 years clinical experiences & more than 1 year working experience
- has learned general surgeon or colorectal surgeon surgical technique.
- applicant's profile will be assessed.

Contact Point

Division of Colorectal Surgery

Name: Ching-Wen Huang

E-mail: baseball5824@yahoo.com.tw

Tel: +886-7-3121101-5575

Achievements

- We had conducted 682 cases of Da Vinci robotic rectal cancer surgery. The anal preserving rate was 95%, which is comparable to the major medical centers in the world.
- The research team also has a lot of discovery and has published ninety-two articles on SCI journals since 2016.
- We have trained medical students and surgeons from all over the world.

Kaohsiung Veterans General Hospital

Carotid ultrasonography Training Program

Our neurosurgical intensive care unit (NSICU) established in 1988. Currently, we have a bed modernized unit, which have the capabilities of caring all neurocritical illness patients.

Duration:

- Duration: 1-2 months

Program fee:

- N/A

Accommodation:

- Other: Application for dorm (limited)

Program Details

Study Objective

1. Doppler Sonography introduction
2. Hands-on technique education
3. Live demonstration
4. Patient transference discussion for further intervention with radiologist

Applicant Qualification

Basic qualifications

- More than 1 year working experience

Others specifications

- Doctor license and English ability

Contact Point

Ms. Chin-Hsiu Wei

Tel: +886-7-342-2121 #71544

E-mail: chwei@vghks.gov.tw

Achievements

Clinical Achievement

- The Stroke Medical Center combines neurologist, neurosurgeon, radiologist and Intensive care unit.
- Extracranial carotid artery disease is an important and treatable cause of stroke. Patients with severe stenosis ipsilateral to a nondisabling stroke or transient ischemic attack who are candidates for intervention should have the stenosis fixed, likely relatively early after their ischemic stroke. The choice between carotid endarterectomy and carotid artery stenting should be driven by specific patient comorbidities and features of their vascular anatomy.

Case number

- 2977 cases in 2020
- 2169 cases in 2019
- 2903 cases in 2018

Taipei Medical University - Shuang Ho Hospital, Ministry of Health and Welfare

ROSA Robot Training Program

With minimally invasive and microscopic techniques, we provide the treatment on neuropathy such as painfulness caused by cervical vertebrae, thoracic vertebrae, lumbar disc herniation, spinal dislocation or stenosis, and provides surgery for spinal emergency trauma, degenerative spinal disease, and endoscopic treatment.

Duration:

- Short-time training: < 1 months/ 2 person
- Long-time training: 3 months ~1 year/ 2 person

Accommodation:

- Other: can assist to arrange.

Program fee:

- Attending Physician: NTD 7,900/day
- Fellow: NTD 5,600/day
- Resident/Nurse/Others: NTD 4,000/day

Meals & other information:

- Administrative fee: NTD 3,000/person

Program Details

Study Objective

1. ROSA
2. Spinal micro-endoscopy
3. Minimally invasive discectomy surgery
4. Steel elastic nail fixation

Related Skills / Surgical Technique

1. ROSA
2. Spinal micro-endoscopy
3. Minimally invasive discectomy surgery

Organ Transplant

Taiwan's hospitals have good 3-year survival rates for organ transplant, which surpass the average of the world. For example, the 3-year survival rates of liver transplant is 91% in Taiwan, whilst the average of the world is around 78%.

Besides, other organ transplant also hits its record in Taiwan, like the 3-year survival rates of kidney transplant is 98%, the 3-year survival rates of heart transplant is 87%, and the 3-year survival rates of lung transplant is 51%.

Organ Transplant Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Tri-Service General Hospital	Liver Transplantation Program	2 months; 6 months	NTD 50,000/ month	041
2	National Taiwan University Hospital	Lung Transplantation	up to 2 years	NTD 10,000/ month	042
3	Kaohsiung Chang Gung Memorial Hospital	Liver Transplantation Program	3-12 months	free	043
4	Far Eastern Memorial Hospital	Kidney Transplantation Program	< 1 months; 3 months ~1 year	Upon discussion	044

Tri-Service General Hospital

Liver Transplantation Program

The Liver Transplantation Team, established in July 2005, is a multidisciplinary team. There are about 30 ~ 50 cases of liver transplantation per year in Tri-service General Hospital

Duration:

- Course 1: 2 months, 2 persons
- Course 2: 6 months, 3 persons

Program fee:

- NTD 50,000/month

Accommodation:

- None

Meals & other information

- Offering lunch

Program Details

Study Objective

1. Pre-transplantation patient evaluation and living donor selection & post-transplantation care
2. Transplantation surgical technique.
3. Immune suppression agent usage & related complications

Surgical technique

1. Donor hepatectomy
2. Liver transplantation surgery

Post liver transplantation care

Applicant Qualification

- More than 5 years clinical experiences of gastrointestinal surgery
- Surgical technique of hepatectomy for at least 200 cases

Contact Point

Division of General Surgery, Department of Surgery

Name: Dr. Lung-Jui, Wang

E-mail: a_gs@mail.ndmctsg.h.edu.tw

Tel: +886-2-8792-3311 #17243

Achievements

- We had conducted more than 500 cases of liver transplantation and the five-year survival rate was 75%, which is comparable with the major centers in the United State and Asia.
- The research team also has a lot of discoveries and publishes in liver transplantation.
- This course is a newly designed program.

National Taiwan University Hospital

Lung Transplantation

The Division of Thoracic Surgery primarily serves patients with diseases arising in the chest, including the lungs, mediastinum, and esophagus.

**Duration:**

– Course: up to 2 year / person

**Program fee:**

– A total of certain amount of tuition fee might be charged based on a standard rate of less than or equal to 10,000 New Taiwan Dollar/per month.

**Accommodation:**

– None

Program Details

Study Objective

1. Recipient and donor selections for lung transplant
2. Post-transplant ICU care
3. Immunosuppression therapy for lung transplant

Related Skills / Surgical Technique

1. Surgical technique training, including general thoracic surgery and lung transplant.
2. Video-Assited Thoracoscopic Surgery
3. Bronchoscopic training

Applicant Qualification

- Qualified licenses (medical degree or equivalent) with more than 1-year clinical working experience.

Contact Point

Department of Medical Education

Name: Ms. Chen

E-mail: huiling0602@ntuh.gov.tw

Tel: +886-2-2312-3456 ext. 265612

Achievements

- We had conducted 149 cases of lung transplantation, which account for about 50% lung transplant surgeries in Taiwan.
- We had signed an MOU(memorandum of understanding) with National Respiratory Center Persahabatan Hospital of Indonesia, and kept cooperate with lung transplantation training program.
- Viet Duc Hospital assigned one team (11 people) to NTUH for lung transplant training during June, 2018 to Dec, 2018. After training course, they successfully completed 6 cases of lung transplantation.
- Lung center in Philippines assigned 4 people to NTUH for lung transplant training during 15 Nov 2015 to 31 Dec 2015.
- We published 27 papers and had 26 lectures about lung transplantation. We have trained 14 surgeons from all over the world.

Kaohsiung Chang Gung Memorial Hospital

Liver Transplantation Center

KCGMH houses the nation's leading Liver Transplant Center. The Director, Professor Chao-Long Chen, performed the first successful liver transplant in Asia in 1984. The center is staffed by highly trained professionals in the field of liver transplantation which include surgeons, anesthesiologists, radiologists, internists, nurses and researchers all equipped with state-of-the-art technologies and facilities.

Duration:

- Course 1: 3 months/ person
- Course 2: 6 months/ person
- Course 3: >1 year/ person

Accommodation:

- Other: Free of charge single's dormitory

Program fee:

- Free of charge

Program Details

Study Objective

The program provides training in

1. the surgical management of liver, pancreas and biliary diseases.
2. liver graft procurement for both deceased and living donor transplantation
3. the management of liver transplant recipients, including indications, complications, immunosuppression, and surveillance.
4. the care and management of critically ill patients (Liver ICU)

Related Skills / Surgical Technique

1. Comprehensive management (pre-operative, intra-operative, post-operative) of liver transplant and HPB patients.
2. Advanced surgical techniques and strategies for liver diseases
3. Different diagnostic and therapeutic modalities

Applicant Qualification

- The applicant must have fulfilled the requirements for completing a general surgery residency or its equivalent in an accredited and reputable institution
- The applicant must be of good moral character, physically and mentally fit.

Contact Point

Liver Transplant Center

E-mail: clchen@cgmh.org.tw

Tel: +886-7-7317123#8097

Website: <https://www.clchen.org.tw>

Achievements

- The KCGMH Liver Transplant Center has performed over 2300 liver transplants as of March 2023. Of these cases, 88% were living donor liver transplantation. Its survival statistics in LDLT have been at forefront when compared with the overall survival rates in the USA, Europe and Japan.
- Professor Chao-Long Chen has published more than 500 SCI-cited scientific articles and has lectured in over 500 international and overseas congresses, honorary and visiting professorships.
- The program has trained more than 400 international fellows and observers to-date. The survival rate of liver transplantation is among the highest in the world. The 5-year survival rates are 98% for biliary atresia (Am J Transplant 2006); 91% for hepatitis B (Liver Transplant 2007), and 90% for liver cancer (Transplantation 2008). The center was bestowed with the 2005 Gold Award of National Biotechnology and Medical Care Quality for its excellence in quality of services, 2010 Silver Award of National Biotechnology and Medical Care Quality for Liver Transplant Imaging, 2014 Gold Award of National Biotechnology and Medical Care Quality for Liver Transplant Nursing, 2016 Silver award of National Biotechnology and Medical Care Quality for Liver Transplant Clinicopathology. For more information: <http://www.clchen.org.tw/>

Far Eastern Memorial Hospital

Kidney Transplantation Program

Kidney transplantation program at Far Eastern Memorial Hospital started in year 2002. Now it's one of the active programs in Taiwan, covering deceased donor kidney transplantation, living donor kidney transplantation, ABO incompatible kidney transplantation and highly sensitized recipient kidney transplantation.

**Duration:**

- Course 1: < 1 months, 4 people
- Course 2: 3 months ~1 year, 4 people

**Program fee:**

- Negotiable

**Accommodation:**

- Additional fee, NTD 2,000 / week

**Meals & other information:**

- None

Program Details

Study Objective

1. Pre-operative evaluation of kidney transplantation
2. Immunologic assessment of ABOi and high sensitized recipients.
3. Post-operative patient cares, from immediate post-op to long term follow up.

Related Skills / Surgical Technique

1. Pre-operative assessment and evaluation of patients
2. Important trouble shooting managements during surgery.
3. Post-operative care
4. Transplant kidney evaluation and management

Applicant Qualification

- More than 3 years clinical experiences & more than 1 year experience in kidney transplantation program (pioneer for setting up kidney transplantation program could be accepted).
- Has basic transplantation knowledge
- Technique/applicant's profile will be assessed

Contact Point

Strategy Planning Department

Name: Ms. Huang

E-mail: planfemh@gmail.com

Tel: +886-2-77281018

Achievements

- Until recently, we have accumulated more than 208 cases of kidney transplantation. We started our living related kidney transplantation in year 2003 and almost 100% of donor nephrectomy at FEMH received laparoscopic surgery. Donation after Circulatory Death (DCD) program started in year 2019 and we are one of the active centers in Taiwan. With a team of experienced transplant surgeons, nephrologists, and dedicated educators, we offer a comprehensive curriculum that covers every aspect of kidney transplantation, from evaluation to post-operative care.

Orthopedics

Taiwan is the regional leader in orthopedics. Taiwan has developed several subspecialty in the field of orthopedics. These subspecialties are mainly classified by parts, such as spinal surgery, hand surgery, joint reconstruction, trauma orthopedics, sports medicine, bone oncology, pediatric orthopedics, and so on.

Taiwan's hospital is especially good at joint replacement and sports medicine. There are 20,000 cases of joint replacement an year on average. Almost every regional and teaching hospital performs the procedure up to US' standards.

Moreover, Taiwan widely uses MIS surgery, computer-aided navigation and rotation osteotomy to reduce the tissue trauma during operation and shorten the restoration time significantly. In general, patients can take care of themselves the day after the surgery and return to their normal life within two weeks.

Orthopedics Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Taipei Tzu Chi Hospital	Advanced Foot and Ankle Surgery Program	6 months	NTD 80,000/ month	047
2	E-DA Hospital	Trauma and Reconstruction	< 3 months; 1 year	Upon discussion	048
3	Far Eastern Memorial Hospital	Minimally invasive spine surgery	6 months; 12 months	NTD 30,000/ month	049
4	Dalin Tzu Chi Hospital	Knee Health Promotion Option	1 week	NTD 200,000/ week	050
5	Kaohsiung Municipal Ta-Tung Hospital	Advanced Knee and Hip Arthroplasty Program	<1month; 3 months-1 year	NTD 50,000/ month	051
6	Tainan Municipal An-Nan Hospital - China Medical University	Spine surgery Training Course	< 1 months; 3 months ~1 year	NTD 10,000/ month	052

8	Taichung Veterans General Hospital	Comprehensive Robotic Surgery Program	1~3 months	NTD 1,500 / Administration fee	054
9	National Taiwan University Hospital, Hsin-Chu Branch	Orthopedics joint replacement Program	< 1 months; 3 months ~1 year	NTD 10,000/ month	055

Taipei Tzu Chi Hospital

Advanced Foot and Ankle Surgery Program

The Foot and Ankle Team, led by Dr. Chen-Chie Wang, has vast experience in foot and ankle surgery, including different kinds of soft tissue repair, corrective osteotomies, fusion, to total ankle replacement. Minimally invasive surgery is another feature of our team, and Dr. Wang has developed several surgical techniques to accomplish such achievement.

Duration:

– 6 months, 1 person

Program fee:

– NTD 80,000/month

Accommodation:

– Additional fee, NTD 3,000 / month

Meals & other information:

– None

Program Details

Study Objective

1. To learn the vast diversity of foot and ankle disorders
2. To understand different types of foot and ankle deformities
3. To learn soft tissue injuries of foot and ankle

Related Skills / Surgical Technique

1. Corrective osteotomies of foot and ankle deformities
2. Arthroscopic surgery of ankle
3. Minimal invasive soft tissue reconstruction of foot and ankle

Applicant Qualification

- The applicant needs to have more than 2 years clinical experiences in orthopedic surgery

Contact Point

Department of Medical Education

E-mail: med-edu@tzuchi.com.tw

Department of Orthopedic Surgery

Dr. Chen-Chie Wang, Professor, MD, PhD.

Tel: +886-2-6628-9779#3123

Achievements

- The team performed over hundreds of cases per year, and the reputation has spread abroad for which many patients had been brought from other countries to our hospital for pursuing treatments.
- Chung-Li Wang, Pei-Yu Chen, Kai-Chiang Yang, Hsing-Cheng Wu, Chen-Chie Wang. Ultrasound-Guided Minimally Invasive Surgical Resection of Retrocalcaneal Bursitis: A Preliminary Comparison with Traditional Open Surgery.

E-DA Hospital

Trauma and Reconstruction

The orthopedic surgery department of E-Da Hospital is one of the most famous trauma team in the world. We are also the designated trauma training center in Taiwan by the AO foundation. Our superintendent, Professor Yuan-Kun Tu, is also the master of brachial plexus injuries and nerve regeneration.

**Duration:**

- Course 1: < 3 months, 2 person
- Course 2: 1 year, 1 person

**Program fee:**

- The program fee is upon discussion

**Accommodation:**

- Additional fee, NTD 160/day

Program Details

Study Objective

1. Basic concept of fracture
2. Advanced surgical techniques for multiple trauma
3. Basic technique of microsurgery and soft tissue reconstruction

Related Skills / Surgical Technique

1. Basic surgical technique of fractures
2. Basic microsurgery technique

Applicant Qualification

- Residents or Attending of Orthopedic surgery

Contact Point

Secretary, Miss Huang

Email: ed110074@edah.org.tw

Tel: +886-7-6150011

Fax: +886-7-6150913

Achievements

- We treat thousands of trauma cases every year and is one of the highest volume trauma center in Taiwan. We deal with not only bony fractures, but also soft tissue reconstruction and microsurgeries.

Academic Research

- We have a biomechanical lab specialized in biomechanics and implants evolution. More than 100 papers are published on SCI journals from the department and the lab every year.

Experience in Training

- Dr. Ching-Ho Ma, faculty and instructor of AO foundation, is responsible for the trauma training courses. Hundreds of local and international fellows from all over the world had been trained in our institute in the past decades, and more of them are coming for their fellowship in the near future.

2011 Annual Meeting of Taiwan Society for Surgery of the Hand (TSSH) and Cross-strait Summit Forum on Reconstruction of Hand Function

AO Trauma Master Course - Complex Fracture and Complication

Far Eastern Memorial Hospital

Minimally invasive spine surgery

The Spine team of Department of Orthopedic Surgery at FEMH have performed over 4,200 minimally invasive spine surgeries (MISS) since 2005. There is a diverse range of MISS procedures: microendoscopic spine surgeries for disc herniation and degenerative spinal canal stenosis, percutaneous vertebroplasty/kyphoplasty, mini-open transforaminal lumbar interbody fusion, and oblique lumbar interbody fusion. In 2018, we have pioneered the most advanced full-endoscopic MISS procedure: unilateral biportal endoscopic (UBE) techniques. Spine surgeries were upgraded to an advanced level with the least tissue damages, minimal blood loss, excellent surgical fields, and fast recovery. The UBE techniques overcame the shortages of full-endoscopic MISS and led to effective, efficient, and safe treatment results. In 2019, we have successfully applied UBE technique in nearly all patients that required spine surgeries including spine fusion. The in-hospital stay for patients that received UBE fusion surgeries decreased by an average of 1.9 days as compared with mini-TLIF. This pioneer surgical technique has also received high recognitions in both national and international spine symposiums and conferences. Major hospitals in Taiwan have sent their surgeons to observe and to learn at FEMH. We designed programs to welcome and to share with all surgeons that are interested in advance MISS techniques.

Duration:

– 6-month course, 12-month course

Accommodation:

– Additional fee, NTD 2,000/week

Program fee:

– NTD 30,000/month

Meals & other information:

– Not Included

Program Details

Study Objective

1. Concepts and theory of MISS
2. Pre-operative planning for MISS
3. Basic MISS techniques
4. Advanced MISS techniques
5. Clinical studies for MISS

Related Skills / Surgical Technique:

1. Unilateral biportal endoscopic (UBE) technique for lumbar spine
2. UBE technique for cervical and thoracic spine surgery
3. UBE technique for revision spine surgery
4. UBE technique for spine fusion
5. Percutaneous vertebroplasty/kyphoplasty and related advanced application

Applicant Qualification

M.D., Orthopedic or Neurosurgeon with specialist license

- Experience as a spine surgeon for at least 2 years.
- Willing to participate in the clinical research.

Contact Point

Strategy Planning Department

Name: Ms. Huang

E-mail: planfemh@gmail.com

Tel: +886-2-77281018

Achievements

- More than 4,200 cases of minimally invasive spine surgery (MISS) since 2005
- A leading teaching center for MISS in Taiwan
- A leading team for advanced unilateral biportal endoscopic (UBE) spine surgery in Taiwan. More than 1000 cases of UBE surgeries since 2018
- A leading team for UBE fusion surgery in Asia and world since 2019
- Cooperate with industries for design and development of novel surgical instruments and surgical techniques

Dalin Tzu Chi Hospital

Knee Health Promotion Option

Based on our research in the medial abrasion syndrome and our experience in performing the ACRFP (arthroscopic cartilage regeneration facilitating procedure), we inaugurated the comprehensive Knee Health Promotion Option, KHPO, in 2007. Physicians in orthopaedics, family medicine, rheumatology, rehabilitation and their nurses are welcome to join us to provide care to sufferers of knee OA.

**Duration:**

– Course: 1 week, 2 person

**Program fee:**

– Course: NTD 200,000/week

**Accommodation:**

– Other: Need to apply for separately at your own expense.

Program Details

Study Objective

1. Learn about “medial abrasion syndrome”, the real etiological mechanism for osteoarthritis of the knee. Study pathological changes and clinical characterization.
2. Learn about the “Knee Health Promotion Option”, a comprehensive treatment protocol.
3. Learn key surgeries.

Related Skills / Surgical Technique

1. Arthroscopic Cartilage Regeneration Facilitating Procedure, ACRFP
2. Microplasty Of The Knee
3. Precision Total Knee Replacement

Applicant Qualification

- An orthopaedic attending physician for at least two years
- having performed at least 100 arthroscopic operations.

Contact Point

International Knee Health Promotion Center

Name: Ms. Cheng

E-mail: leeann@tzuchi.com.tw

Tel: +886-5-2648000 ext.5234

Website: <http://khpo.iiiedu.org.tw/zh/about/>

Achievements

- At our center, we treat about 800 patients a year under the KHPO program. Our research lab has continued to work. We expect to further raise the success rate of the KHPO.

This table contains the results of 520 KHPO patients in 2011 after 3-year follow-ups.

KHPO treatment results		
Severity	Clinical Symptoms	satisfaction rate
II	slightly deformed	91.2%
III	bone spurs, moderately deformed	93.6%
IV	severely deformed, need knee replacement	91.2%

- Repeated impingement between mediopatellar plica (medial plica) and the opposite medial femoral condyle during knee motion causes a medial abrasion phenomenon, which is an important cause for the cartilage in the knee to be gradually worn off (commonly but erroneously referred to as “degenerated”). Twelve papers about this have been published in international journals. We have trained 5 surgeons from all over the world.

Kaohsiung Municipal Ta-Tung Hospital

Advanced Knee and Hip Arthroplasty Program

Duration:

- Course 1: <1month, 2 persons
- Course 2: 3months-1year, 2 persons

Accommodation:

- None

Program fee:

- NTD 50,000/month
- For more learning content, additional fee NTD 30,000/week

Meals & other information:

- Offering lunch

Program Details

Study Objective

1. The pre-operative plotting and planning of primary knee and hip reconstruction
2. The tension balance technique in total knee replacement
3. Bone defect assessment and reconstruction in revision knee and hip arthroplasty
4. Complex revision hip surgery with different surgical approaches

Related Skills / Surgical Technique

1. Uni-Knee with mobile or fixed bearing surface
2. Primary total knee replacement with different alignment balance
3. Treatment of post-traumatic hip osteoarthritis

Applicant Qualification

- A qualified orthopedic surgeon with the clinical experience from 2~5 years.
- The trainee should be able to speak English or Mandarin.

Contact Point

International Medical Service Center

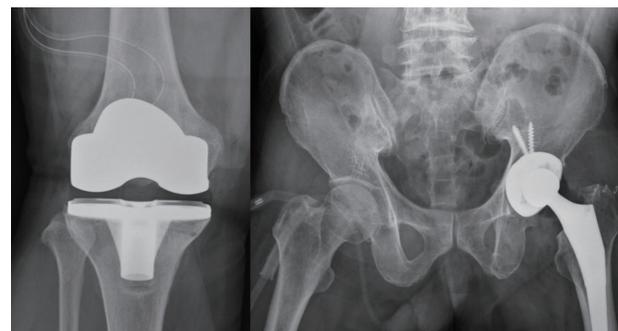

Name: Miss. Kang

E-mail: intl.center@kmtth.org.tw

Tel: +886-7-2610000

Achievements

- The Kaohsiung Municipal Ta-Tung Hospital (KMTTH) joint reconstruction team was led by Professor Huang Hsuan-Ti and Professor Chen Chung-Hwan, highly specialized in knee and hip replacement surgeries.
- The KMTTH and its joint reconstruction satellite facilities performed over 400 total knee and hip replacement per year, from primary knee and hip replacements to complex revision surgeries and orthopedic oncological reconstructions. The successful rate and satisfaction rates were well-above average.
- The KMTTH orthopedic department had an orthopedic research center. With publication of innovative investigation in knee arthritis and osteoporosis treatment. We have 3-5 trainees from the nearby countries each year.

Tainan Municipal An-Nan Hospital - China Medical University

Spine surgery Training Course

The An-Nan Hospital Spine Team, established on 2006, is a multidisciplinary team, including Orthopedics, Neurosurgeon, Rehabilitation, Pain, and Chinese Medicine physicians.

**Duration:**

- Course 1: < 1 months, 1 person
- Course 2: 3 months ~1 year, 1 person

**Program fee:**

- NTD 10,000/month

**Accommodation:**

- Additional fee, NTD 3000 /week

**Meals & other information**

- Offering lunch

Program Details

Study Objective

1. Scoliosis.
2. Minimal Invasive Spine surgery.
3. Cell therapy for Spinal cord injury.
4. 3-D Printing guiding surgery for

Related Skills / Surgical Technique

1. Scoliosis surgery
2. Minimal invasive TLIF
3. Cortical bone Trajectory
4. Endoscopic spine surgery

Applicant Qualification

- has more than 3 years clinical experiences & more than 1 year working experience in spine disease
- has learned spine basic technique/applicant's profile will be assessed.

Contact Point

Achievements

- We had conducted more than 1200 spine surgery cases each year, and good improvement rate, good Easy Recover After Surgery (ERAS) rate, and low complication rate recorded.
- The research team of An-Nan Hospital Spine Center also has a lot of discovery and publishes in spine surgery technics, biomaterials and biomedical engineering.
- We have trained more than 20 surgeons from Taiwan, Mainland China, East South Asia, and all over the world, .

Kaohsiung Chang Gung Memorial Hospital

Adult Reconstruction and Sports Medicine Fellowship Program

This reconstruction fellowship program is designed to help fellows to refine skills in the specialized care of joint replacement patients, and in research related to biomechanics and biomaterials. Academic opportunities include journal clubs, scientific conferences, gait, biomechanics, biomaterials, and tissue engineering facilities. And, the sports medicine program serves to provide appropriate training to individuals interested in the field of arthroscopic surgery and sports medicine. The sports medicine team provided the most comprehensive care from the school to professional level athletes.

Duration:
– 3~12 months

Program fee:
– Free of charge

Accommodation:
– Free of charge single's dormitory

Program Details

Study Objective

This fellowship program is designed to help fellows refine skills in the specialized care of joint replacement or arthroscopic surgery patients, and in research related to biomechanics, sports medicine and biomaterials. Academic opportunities include journal clubs, scientific conferences, gait, biomechanics, biomaterials, and tissue engineering facilities.

Related Skills / Surgical Technique

1. Joint Replacement
2. Orthopedic oncology musculoskeletal infection
3. Arthroscopic and soft tissue reconstruction Surgery
4. Minimally Invasive Surgeries

Applicant Qualification

- more than 1 year working experience

Contact Point

Chang Gung Memorial Hospital, Orthopedic Surgery

Name: Ms. Chuang

E-mail: yah@cgmh.org.tw

Tel: +886-7-7317123-2076

Achievements

- Approximately 100 joint replacements and other adult reconstructive procedures per month.
- Approximately 100 arthroscopic or soft tissue reconstruction surgery per month.
- The research team also has a lot of discovery and publishes in SCI Journal. And the average production of scientific research are more than 10 SCI publications per year.
- We have trained 11 surgeons from Jordan, Sudan, India and Nigerian in three years.

Taichung Veterans General Hospital

Comprehensive Robotic Surgery Program

Taichung Veterans General Hospital (TCVGH) has adopted advanced robotic surgeries in various specialties. We purchased the first Da Vinci standard robot in November 2005 and soon initiated its multi-discipline utilization in urology, cardiovascular surgery, laryngology, head and neck surgery, proctology, general surgery, gynecology, chest surgery and plastic surgery. We also established the Mazor robotic spine surgery system in 2018. This system significantly increases the precision of screw implantation, as well as surgical safety. Currently, our hospital is the only public medical center applying the system.

Duration:

– 1~3 months, 4 person

Accommodation:

– Free, limited space for accommodation.

Program fee:

– NTD 1,500 /Administration fee

Meals & other information

– No

Program Details

Study Objective

1. Differential diagnosis, patient selection, and preoperative planning
2. Surgical technique
3. Postoperative care and rehabilitation program

Related Skills / Surgical Technique

1. Urologic Robotic Surgery
2. Colorectal Robotic Surgery
3. ENT Trans-Oral Robotic Surgery
4. Esthetic Neck Surgery
5. Mazor Robotic Spine Surgery

Applicant Qualification

- hysician

Contact Point

Achievements

- While providing a high-standard and high-quality of integrated and holistic prostate cancer care, our urologic robotic surgery team was awarded the Certificate of Symbol of National Quality: Prostate Disease Center Medical Care in Da Vinci Robotic Surgery in 2008, the Robotic Radical Prostatectomy World Class Guarantee in 2015, and the Preventive Robotic Assisted Radical Prostatectomy- Holistic Health Care of Prostate Disease Pioneer in the World in 2016,
- The colorectal robotic surgery team had successfully completed 200 cases of da Vinci surgery in 2020 and became the only certified da Vinci Xi colorectal surgery observation center in Taiwan. We were also the first facility certified by the ERAS International Society in Taiwan.
- Our Otolaryngology Head and Neck Surgery team has been performing Trans-Oral Robotic Surgery (TORS) and Esthetic Robotic Neck Surgery (ERNS) since 2010. Besides, developing innovative techniques to treat early T1-2 hypopharyngeal cancer and glottic cancer involving the anterior commissure, we have published the largest cohort of TORS-assisted total laryngectomy for recurrent laryngeal cancers. The practice was further awarded with the Symbol of National Quality in 2021.
- Our Orthopedic is the pioneer to perform Anterior Lumbar Interbody Fusion (ALIF) or Oblique Lateral Interbody Fusion (OLIF) procedures, combined with Mazor-assisted posterior screw instrumentation, to treat high-grade spondylolisthesis and severe spinal deformities. This unique technique was rewarded the Symbol of National Quality (SNQ) 2022.

National Taiwan University Hospital Hsin-Chu Branch

Orthopedics joint replacement Program

Our Orthopedics joint replacement team provides holistic medical care, including preoperative health education and nutritional assessment, intraoperative monitoring, and postoperative deep vein thrombosis prophylaxis and physical therapy training. Our teamwork was awarded by the Disease Specific Care (DSC) Certification Program in 2021.

Duration:

- Course 1: < 1 months, 2 person
- Course 2: 3 months ~1 year, 2 person

Program fee:

- NTD 10,000/month

Accommodation:

- Additional fee, NTD4200 / week

Program Details

Study Objective

1. Understand the basic knowledge of joint osteoarthritis and treatment choice
2. Familiar with disease specific care program for joint replacement

Related Skills / Surgical Technique

1. Shared decision making
2. Preoperative evaluation and preparation
3. Post-operative care

Applicant Qualification

- More than one year clinical experience of taking care of joint arthroplasty patient.

Further
Information

Plastic Surgery

Plastic surgeons in Taiwan have been standing an important position in the field of plastic surgery worldwide. Medical doctor in Taiwan have created and improved many core surgical techniques and trained many plastic surgeons from all over the world.

- Reconstructive surgery: Taiwan's surgeon are good at reconstructive surgery, especially for cleft lip and palate and craniofacial reconstruction. Taiwan has accumulated more than 30,000 patients since 1978, and achieving 100% success rate.
- Cosmetic/Aesthetic surgery: The main cosmetic procedures you can learn from Taiwan includes breast augmentation, liposuction, double eyelid surgery, facial bone reduction, endoscope cosmetic surgery and etc.

Plastic Surgery Training Program

No	Hospital Name	Program Name	Program Duration Zone	Program Fee	Page
1	Linkou Chang Gung Memorial Hospital	Craniofacial Center Fellowship/Observership	< 6 months; 1 Year	Free	059
2	E-DA Hospital	Microsurgery and Reconstruction	< 3 months; 1 year	Upon discussion	060
3	China Medical University Hospital	Advanced Reconstructive Microsurgery	3 ~ 12 months	Upon discussion	061
4	Cathay General Hospital	Vascular anomalies training program	1~3 months	NTD 20,000/ month	062

Linkou Chang Gung Memorial Hospital

Craniofacial Center Fellowship/Observership

We are worldwide well-known craniofacial training center for Cleft Lip / Palate care, Microtia Surgery, and Orthognathic Surgery. We accept training foreign medical staff for clinical research, academic publication, and surgical techniques training.

Until December 2021, we have provided over 100 international voluntary cleft medical services in different countries, during international voluntary cleft medical services. We have also hosted many international conferences and workshops, e.g., Chang Gung Forum every year since 2000.

Duration:

- Observer: < 6 months of training, 12 persons per year
- Fellow: 1 Year of training, 3-4 persons per year

Program fee:

- None

Accommodation:

- Free dormitory provided, which should be shared with other visitors/ fellows

Program Details

Study Objective

1. different stages of cleft lip and palate treatment from the birth until adulthood.
2. patient selection for orthognathic surgery, surgical planning, surgical simulation and different of surgical techniques.
3. microtia surgical techniques

Related Skills / Surgical Technique

1. Orthognathic Surgery
2. Cleft Lip and Cleft Palate
3. Microtia surgery

Applicant Qualification

- Working in the hospital
- Medical certificate and license
- Has more than three years of clinical experience and more than one year of working experience.
- Surgery certificate, plastic and reconstructive surgery certificate.
- At least senior residency, better-attending doctors.
- Recommendation letters from the department authorities.

Contact Point

Chang Gung Craniofacial Center

Name: Ms. Mickey Chou / Ms. Serena Liao

E-mail: mickeychou@cgmh.org.tw
abcdef@cgmh.org.tw

Tel: 03-328-1200

Achievements

- Until 2019, we have conducted OGS of over 9800 cases, newborn cleft over 15,000 patients, and Microtia of over 1700 cases. Our surgical success rate is over 99%.
- More than 400 international SCI papers have been published in our training center.
- Until December of 2021, we have trained 860 trainees from 60 countries.

E-DA Hospital

Microsurgery and Reconstruction

The Department of Plastic and reconstruction surgery established in 2004 is an internationally known high-volume center for microsurgery. Here, our specialists provided high quality care in a multi-disciplinary setting, mainly for patients with head and neck cancers, but also other reconstructive needs.

**Duration:**

- Course 1: < 3 months, 2 person
- Course 2: 1 year, 2 person

**Program fee:**

- The program fee is upon discussion

**Accommodation:**

- Additional fee, NTD 160/day

Program Details

Study Objective

1. Comprehensive and advanced modern plastic surgical training
2. Microsurgery workshop and microsurgery training in animal models
3. Facial trauma management
4. Craniofacial deformity treatment
5. Surgical mission trips overseas

Related Skills / Surgical Technique

1. Free-style perforator flap
2. Free- style recycled flap

Applicant Qualification

- Residents or Attending of Plastic surgery

Achievements

- Amputation rate is lower than 5%. The number is also lower than an average number (10-15%) found in foreign researches.
- We assist in establishing the Wound Care Center in the Republic of the Marshall Islands in November 2018.

China Medical University Hospital

Advanced Reconstructive Microsurgery

Duration:

- 3 months to a year or more
- At most 7 fellows at one time

Accommodation:

- Lodging and meals not included

Program fee:

- The program fee is to be determined upon discussion

Program Details

Study Objective

1. Free skin flaps for reconstruction surgery
2. Intestinal flap for venous reconstruction
3. Lymphedema surgery and supermicrosurgery
4. Regional and conventional flaps which are used for solution of possible complications or patients not auditable for free flaps
5. Advanced microsurgery for complex deformities

Applicant Qualification

- More than 3 years of clinical experience in plastic surgery.
- Valid Physician/Medical License

Contact Point

International Center

Ms. Luna Lin

a32284@mail.cmuh.org.tw

Further information:

<https://edu.lib.cmuh.org.tw/media/1818>

Achievements

- The achievements in reconstructive microsurgery in the department are unrivaled in the world and create a new breakthrough in complex microsurgical reconstruction, such as voice reconstruction with autologous intestine, or appendix reconstruction of the cervix and vagina with the large intestine, reconstruction of the vagina with the transverse colon, reconstruction of many organs (esophagus, ureter, and urethra), limb reconstruction, reconstruction of the head and neck and reconstruction of the lymphatic system.
- Prof. Hung-chi Chen, the Director of the International Center, also has special ideas on the treatment of lymphedema. Depending on the patient's severity, various surgical modalities, including modified Charles' surgery, extensive subcutaneous tissue excision with preservation of perforators, and lymphatic tissue transplantation, are very effective in alleviating lymphedema in the patient's upper or lower extremities.
- Prof. Hung-chi Chen has trained around 200 foreign doctors from the United States, UK, Italy, Belgium, Brazil, Japan, Hong Kong, Singapore, South Korea, etc.

Cathay General Hospital

Vascular anomalies training program

At Cathay General Hospital, our plastic surgery department treats hemangiomas and vascular malformations on a long-term basis. The number of cases treated annually exceeds 1,000. We provide appropriate treatment options based on different types of vascular anomalies. We prescribe oral propranolol and perform dye laser treatment for infantile hemangiomas. The treatment is effective. Recently, we have utilized advanced hybrid operating room equipment, working with radiologists and cardiologists, to selectively identify the specific feeding vessels causing the disease through high-resolution angiography, and immediately treat the diseased vessels with vascular embolization. Interrupting the blood supply to high-flow vascular malformations and immediately adding local sclerotherapy or surgical resection can achieve good therapeutic results and patient satisfaction.

**Duration:**

- 1~3 months/ 2 trainees

**Program fee:**

- NTD 20,000/month

**Accommodation:**

- Included in the program fee
- Serve lunch and dinner boxes

Program Details

Study Objective

1. Differential diagnosis of hemangiomas
2. Multidiscipline treatment of vascular malformations
3. Super-selective trans-arterial embolization for fast flow vascular malformations
4. Application of sclerotherapy
5. Laser treatment

Applicant Qualification

- Plastic surgeon

Achievements

- Most amount of vascular anomalies cases in Taiwan

Chang Bing Show Chwan Memorial Hospital

Intensive Course in Laparoscopic General Surgery

Show Chwan Health Care System is one of the largest private health care systems with hospitals located throughout Taiwan. In 2008, IRCAD/AITS-Asian Institute TeleSurgery was established through the collaboration between Show Chwan and Health Care System in Taiwan and IRCAD/EITS in France. With efforts from all employees at Show Chwan Health Care System, AITS not only improved medical quality in Taiwan but also enhanced Taiwan's visibility in the international health care community. So far, hundreds of courses have been taught in IRCAD Taiwan including General Surgery, Shoulder Joint, Knee Joint, Liver, Colon & Rectal, Upper GI, Obstetrics, etc. In order to advance minimally invasive surgery in the future, we will be planning courses in different medical fields such as Neurosurgery, Otolaryngology, Plastic Surgery, Vascular embolization, Heart Stent, etc.

IRCAD Taiwan hosts more than 600 surgeons from around the world each year, including from Japan, China, and Singapore, etc. These surgeons participate in workshops and hold classes on such subjects as minimally invasive digestive system surgery, bone surgery, and urological surgery, etc.

Duration:

- Course 1: 5 days, up to 40 persons
- 2023/10/23-27, 2024/3/11-15, 2024/10/21-25

Program fee:

- NTD 90,000/each course

Accommodation:

- Hotel

Meals & other information:

- Offering lunch

Program Details

Study Objective

1. To provide the basic knowledge required for clinical applications
2. To describe all the basic principles (instruments, materials, equipment) and present the most used basic laparoscopic techniques
3. Hands-on training sessions to learn or improve performance of basic technical tasks in laparoscopic surgery such as intracorporeal suturing and knots tying techniques, two-hands coordination for dissection, safe use of energy in laparoscopy
4. To describe results and potential complications of laparoscopic procedures

Related Skills / Surgical Technique

1. Interactive theoretical and video sessions between faculty and course participants
2. Live and pre-recorded operative demonstrations

Applicant Qualification

- Doctors in the Department of Medicine
- More than two years (inclusive) in surgery or related fields
- Physicians interested in laparoscopic surgery /Veterinarian

Achievements

- IRCAD, the minimally invasive surgery center understands the satisfaction of the participants with the courses and teachers through the survey and analysis of the satisfaction of the trainees, so as to improve and enhance the quality. Satisfaction survey, by filling out questionnaires, surveys the service quality satisfaction of the minimally invasive surgery center against the three aspects of course content planning, student performance, and service quality. The satisfaction score is out of 5, and the average satisfaction from 2016 to 2021 is 4.8. In addition to the satisfaction survey of the trainees, the trainees will give us considerable praise and affirmation with the comment in the trainee evaluation form.
- IRCAD will first apply related research and development to the training of minimally invasive surgery and publish the relevant results in the global trend of minimally invasive surgery, introduce the concept of an international medical training and research and development center, actively engage in academic research, and improve the academic research by publishing papers. The R&D department of this center is fully responsible for clinical medical imaging research.
- IRCAD has also established an R&D Department dedicated to development of such minimally invasive surgical techniques as 3D remodeling, 2D-to-3D endoscopy, augmented reality surgery, and robotic surgery, thus bringing innovative technology to clinical practice.
- The minimally invasive surgery center successfully obtained the only authorization of IRCAD Asia in 2008 and carried out Show Chwan's leadership in minimally invasive surgery training. IRCAD holds an average of at least 20 courses per year. In addition to general surgery, other specialized high-level minimally invasive courses for shoulder joints, knee joints, liver, colorectal, upper gastrointestinal tract, obstetrics and gynecology, etc. From 2008 to 2021, nearly 8,000 surgeons from 65 countries have come to study. Among them, 59% are Taiwan surgeons, actively helping to improve the level of minimally invasive surgery in Taiwan and even Asia.

Linkou Chang Gung Memorial Hospital

Chang Gung Surgical Training Academy and Research Center

Chang Gung Memorial Hospital has recently inaugurated the Surgical Training Academy and Research Center, an internationally renowned facility situated in the Research Building of its Linkou campus. Following an extensive 30-month development phase, the formal launch occurred on March 14, 2023. The center, occupying approximately 1,500 square meters, stands out as Taiwan's largest surgical training facility. Boasting 24 fully equipped operating tables, it is meticulously designed to facilitate specialized training in minimally invasive surgery, microsurgical techniques, and surgical simulation. The center also features a versatile space serving both as a multipurpose area and a designated resting zone for trainees. Notably, the advanced multimedia capabilities of the center, particularly evident in the international conference hall, with a capacity for nearly 500 participants, create an environment conducive to comprehensive and globally-informed learning experiences.

Duration:

- The course schedule, number of participants, and course fees will be determined according to the registration webpage.

Achievements

- We have the largest volume of da Vinci Surgery in General Surgery field since 2016 in Taiwan.
- 1,211 da Vinci and 1,623 laparoscopic procedures have been performed from July, 2015 to August, 2022, including 478 single-incision da Vinci and 508 single-incision laparoscopic procedures. The ratio of total single-incision surgery is 34.79% (986/2,834); the ratio of conversion from single-incision to multiple-incision is less than 5%.
- We will do oral presentation at the annual meeting of the Taiwan Surgical Association and have three SCI papers published.
- Total of 298 Foreign doctors underwent surgical training or observation in our hospital from May, 2016 to August, 2022. Doctors are from Italy, Germany, Hungary, Greece, India, the Philippines, Thailand, Japan, South Korea and China.

Chung Shan Medical University Hospital

Minimally Invasive Surgery of General Surgery Program

Duration:

– At least 2 weeks

Program fee:

– Depend on the days of staying.

Accommodation:

– The dormitory provides rooms of varying sizes, with monthly rent averaging around NT\$ 7,500. It's conveniently situated a five-minute bus ride from the hospital.
– For internet access, there's an additional charge of approximately NT\$ 333 per month, calculated based on your length of stay and offering exclusive ethernet connectivity.

Program Details

Study Objective

1. Familiar with the principles and techniques of minimally invasive surgery (include Robotic, Laparoscopic and Single incision).
2. Familiar with surgical techniques through clinical surgical observations and exercises.
3. Correcting industry to understand the development trend and innovation of minimally invasive surgery.

Related Skills / Surgical Technique

1. da Vinci Robotic
2. Laparoscopic Surgery
3. Single incision Surgery (Laparoscopic and Robotic)

The above surgical items include Hepatobiliary Surgery, Pancreatic Surgery, Gastrointestinal Surgery, Bariatric Surgery, Thyroid surgery, Breast disease, Hernia

Applicant Qualification

- Board certificate surgeon
- has more than 1 year clinical experiences

Contact Point

da Vinci Minimally Invasive Surgery Center

Achievements

- The General Surgery Department has a dedicated team of attending surgeons, nurse practitioners, surgical assistants, and case managers committed to providing comprehensive patient care from diagnosis to postoperative recovery. We specialize in advancing minimally invasive surgical techniques, including da Vinci and laparoscopic procedures, in areas such as Hepato-pancreato-biliary surgery, thyroid disease treatment, breast surgery, and hernia repair. We are also actively researching reduced port techniques for minimally invasive surgery.
- Since 2016, we have been the leaders in da Vinci Surgery procedures in the General Surgery field in Taiwan. From July 2015 to September 2023, our team completed 1,618 da Vinci procedures and 1,822 laparoscopic procedures, including 517 single-incision da Vinci surgeries and 587 single-incision laparoscopic procedures. Remarkably, 32% of our total surgeries were single-incision (1,104 out of 3,440), with a conversion rate to multiple-incision surgeries of less than 4%.
- We will do oral presentation at the annual meeting of the Taiwan Surgical Association and have three SCI papers published.
- From May 2016 to September 2023, a total of 405 foreign surgeons have participated in surgical training or observation programs at our hospital. These surgeons hailed from various countries, including Italy, Germany, Hungary, Greece, India, the Philippines, Thailand, Japan, South Korea, Singapore, and China.

National Taiwan University Cancer Center

Tubeless VATS Training Program

Our VATS (video-assisted thoracoscopic surgery) team, led by Professor Jin-Shing Chen, has successfully completed over 100,000 cases of lung cancer surgery in the past ten years, and published more the 230 SCI papers in the past twenty years.

Duration:
– 1-2 weeks/ person

Program fee:
– NTD 2,000/day

Accommodation:
– None

Program Details

Study Objective

1. Pre-operative evaluation: Identifying Suitable Candidates for Non-Intubated / Tubeless VATS.
2. Surgical Technique: Learning the Uniportal VATS Procedure.
3. Troubleshooting: Managing Unexpected Situations.
4. Post-operative Clinical Care.

Related Skills / Surgical Technique

1. Uniportal Thoracic Surgery Techniques: Including Non-Intubated/Tubeless VATS.
2. Non-Intubated Anesthesia Techniques.
3. Optional: Image-Guided Localization.

Applicant Qualification

- Qualified licenses (medical degree or equivalent) with more than 1-year clinical working experience

Contact Point

Department of Medical Research and Education

Name: Ms. Xiu-Wen Liao

E-mail: A00823@ntucc.gov.tw

Tel: +886-2-23220322 ext. 38328

Achievements

- We initiated the non-intubated VATS program in 2009. In 2011, Professor Chen published the successful outcomes of the first consecutive 30 cases of non-intubated lobectomy. In 2017, he published 30 consecutive cases of tubeless VATS: patients underwent uniportal VATS without intraoperative endotracheal intubation or postoperative chest tube drainage. In this study, it was observed that a small residual pneumothorax in a small group of patients, and none of them required reintervention or readmission. When compared to 30 other patients with chest tube drains, those who underwent tubeless VATS reported lower pain scale scores and experienced shorter postoperative hospital stays.
- Our team has achieved significant milestones over the past decade, making us the pioneering team in Asia to perform non-intubated/tubeless thoracoscopic surgery. Since 2011, we have published more than 20 SCI papers in the field of non-intubated VATS.
- Since 2017, we have provided training for a total of 21 clinical physicians from overseas, comprising 16 thoracic surgeons and 5 anesthesiologists. These international doctors hail from various countries, including the Czech Republic, Spain, Russia, Mongolia, and India.

Achievements

- Received JCI-CCPC (CAD and stroke care team) certification in 2016
- Installed Trusystem surgical bed, the 1st in Taiwan.
- We won the Potentiality award of the "20th HQIC" by the JCT in 2019.
- Received 5th JCI accreditation in 2021
- Provide training to over 300 medical professionals from around the world.

Ditmanson Medical Foundation Chia-Yi Christian Hospital

Nursing administration and management

The vision of Chiayi Christian Hospital is to provide holistic care and medical service based on the core of Jesus teaching "love your neighbor as yourself." According to the vision, the department of nursing provides the staff a friendly working environment to build the excellent nursing team, and collaborates with other departments through teamwork. Chiayi Christian Hospital is committed to being the best hospital in Chiayi and Yunlin.

**Duration:**

Shin Kong Wu Ho-Su Memorial Hospital

Clinical Holistic Nursing Model and Clinical Practice Maternal-Newborn Care

The Department of Nursing is committed to a “Patient First”, and “Team Share” values, for delivering quality healthcare in the safest environment possible. Our Nursing Department is staffed with a total of 1,004 nurses, through Primary Nursing Systems, offers a broad range of nursing services. In compliance with the processes of assessment, diagnosis, planning, implementation and evaluation, provides patients with individual, holistic and continuous nursing care.

Departmental arrangements include: Clinic department, Delivery Room, Nursery, Postnatal ward, Emergency Room, Surgical intensive care unit, Neonatal intensive care unit and rehabilitation center.

Duration:

– Course: 1~3 months /person

Program fee:

– NTD 3,000/day
– NTD 10,000/week
– NTD 30,000/month

Accommodation:

– Additional fee, NTD 3700/month

Meals & other information:

– English taught

Program Details

Study Objective

1. Introduction to the environment and equipment of each maternal and newborn care unit.
2. Maternal and newborn nursing care technology.
3. Maternal and newborn specialized diagnosis and care process.

Applicant Qualification

- For participant who has more than 3-years experience in Maternal-Newborn clinical care.

Teaching Clinic

Mortality conference

Achievements

Clinical performance

- Our Pediatric Cardiology Department has set a number of records in the past decade. For example, 75% of children underwent open-heart surgery do not need to have cardiac catheterization first. They only need to undergo echocardiogram before surgery and the ratio is the highest in the country. It reduces social costs and the physical and mental burden of patients. In addition, cardiac interventional catheterization for congenital heart disease also has excellent achievement, so that the patients can be treated by cardiac catheterization without surgery. Other studies such as the prevalence of anti-penicillin pneumococci are also important in the southern region. We also offer 36 kinds of allergen specific test and quantitative analyzer for the diagnosis of allergic children. The complication of congenital metabolic disorders can be reduced by antenatal diagnosis, genetic counseling, neonatal screening or special diet treatment. The patients with various neurological abnormalities can also be fully diagnosed and treated. Many children with epilepsy are able to resume normal work and rest under medical control.
- In addition, our neonatology department cares very extreme low birth weight with excellent results. The mortality and morbidity rate of premature infants can be maintained at a low level. The most small gestational age graduate without no neurologist complications was 22 5/7 weeks. The most small birth weight graduate was 500gm. The ratio of severe intraventricular hemorrhage of the premature infants in our hospital in 2021 is much lower than the average data in Taiwan, and we are commended and rewarded by the Taiwan Neonatal Medicine Association. We also involve in the clinical care of critically ill infants in the regional medical network, and maintain a good interaction with regional hospitals and obstetrics and gynecology hospitals, offer high quality medical services. On average, we cared for more than 300 newborns who need intensive care per year. We also can provide neonatal therapeutic cardiac catheterization. Currently, we treated a premature infants who weighted 1500 grams with patent ductus arteriosus successfully.

Characteristic

- Pediatric echocardiogram, cardiac catheterization examination and intervention, and cooperate with Division of Cardiovascular Surgery for treatment of children with congenital heart disease.
- Each specialist has sufficient resource and manpower to provide an excellent faculty and learning environment.

Taipei Veterans General Hospital

Pediatric Neurosurgery and Epilepsy Program

**Duration:**

- Course 1: < 1 months, 2-3 person.
- Course 2: 3 months ~1 year, 2-3 person.

**Accommodation:**

- Shared room 3,400 NT/month.
- Single room 500 NT/day.

**Program fee:**

- 10,000 NT/month.

**Meals & other information:**

- Employee restaurant: 65 NT/per meal.

Program Details

Study Objective

1. Pediatric neurosurgery;
2. Microscopic and endoscopic neurosurgery;
3. Epilepsy surgery.
4. Sitting position for posterior fossa tumor, stereo-EEG epilepsy surgery survey.

Related Skills / Surgical Technique

1. Interhemispheric approach for deep brain tumor.
2. Vertical perithalamic hemispherotomy.
3. Endoscopic 3rd ventriculostomy.

Applicant Qualification

- The applicant must have more than 3 years clinical experiences & more than 1 year working experience.
- The applicant has learned neurosurgical technique and his or her profile will be assessed.

Contact Point

SEEG (Stereo-EEG)
Paris, S. Anne Hospital, 1974
Taipei VGH since 2014

Achievements

- The Pediatric Neurosurgical and Epilepsy Surgery Teams, established since 1989, is a multidisciplinary team. We performed 30-50 pediatric brain tumor surgeries and 30-50 pediatric epilepsy surgeries each year which is the biggest program in Taiwan.
- The database for pediatric brain tumor and pediatric epilepsy surgery is more than 2,000 cases and 500 cases, respectively.
- The research team also has a lot of discovery and publication in SCI journals, such as Nature Communication, Neuro-Oncology, Cancer, and Epilepsia, etc.
- We have trained more than 20 fellows from all over the world, especially in Asia.

Tel: +886-4-26581919

Website: www.sltung.com.tw

Achievements

- The team has successfully performed over 3,600 surgeries to date, utilizing the newest Da Vinci surgical system as well as Trusystem surgical bed; patient is able to receive the highest level of care while minimizing surgical risks.
- Since 2019, the COVID-19 global pandemic has profoundly impacted healthcare systems worldwide. Taiwan finally managed the raging outbreak and relieved the border measures on October 13, 2022. Now, in the post-pandemic era, we anticipate reconnecting with the global medical community. Our first step, TICS: The Future of Integrative UroTech International Symposium, is hosted by the Taiwan Urological Association (TUA) and organized by Tungs' Taichung MetroHarbor Hospital, in collaboration with the Tung Chuan-Sheng Cultural Education Foundation. This grand event is expected to become the foremost platform for sharing cutting-edge trends in urology medicine and technology by gathering expert urologists to brainstorm and exchange the latest research progress. The main feature of TICS2023 is "The Future Of Integrative UroTech," the integrative urological technology and treatment. We invited professors of urology departments in Asian medical institutions, senior executives of pharmaceutical and technology companies, teachers, and students from medical universities to join us. And Taiwan government officers in MOHW, NHI, and HPA participated in this grand event. In addition, we presented the "Master Urologist" Keynote Lectures in the opening plenary. This event attracted global urological specialists and affiliated medical professionals from medical institutes and industries, with more than 500 physicians and professors participating.
- Thus far, we've provided Da Vinci robotic surgery to surgeons from China and the Philippines.

Taipei Tzu Chi Hospital

Pediatric urology training program

Pediatric urology has been a pivotal field of interest in our hospital for several years. Professor Stephen Shei Dei Yang, the Deputy Superintendent of Taipei Tzu Chi Hospital, makes an endeavor to further the quality urological care of children and currently serves as the 7th president of APAPU (Asia-Pacific Association of Pediatric Urologists). Peculiarly we put an emphasis on minimally invasive surgeries that limit the size of incisions, diminish associated pain and shorten convalescence.

Duration:

– Course 1: three months, two training staffs in one year

Program fee:

– NTD 80,000/month

Accommodation:

– Additional fee, NTD 3,000 / month

Program Details

Study Objective

1. To learn the nomogram of pediatric voiding
2. Best knowledge to share on pediatric urology
3. Improve skills and expertise on pediatric surgeries

Related Skills / Surgical Technique

1. Interpretation of pediatric voiding patterns
2. Surgical tips for hypospadias repair
3. Minimal invasive surgeries on pediatric urology

Achievements

- We have yielded good successful outcomes on hundreds of pediatric surgeries, including hypospadias repair and mini-laparoscopic herniorrhaphy.
- There were plenty of papers published focusing on pediatric hernia, hypospadias, voiding dysfunction, UPJ obstruction, and innovative Tzu Chi nomogram as well.
- We have trained several fellows from overseas, including the Philippines and Malaysia.

Applicant Qualification

- urological specialist or fellowship

Chi Mei Medical Center

Da Vinci Robotic System Program for Urinary System

In 2012, Chi Mei Medical Center purchased Da Vinci Robotic System instruments, and updated its system from the third-generation (Si) to the fourth-generation (Xi) model in 2019. In 2022, we successfully treated 2,000 patients with Da Vinci Robotic surgery. The urology surgery accounted for the half of it.

The course includes a clinical, new technology didactic presentation and live case observations. The host surgeon's clinical presentation will include discussion on the impact of new Da Vinci Robotic technologies on surgeon training, surgical technique, and patient outcomes.

Duration:

– Course: 1 month; 2 person/year

Program fee:

– NTD 10,000/month

Accommodation:

– None

Meals & other information:

– None

Program Details

Study Objective

Participant surgeons will observe Urology cases with step-by-step descriptions set up, surgical technique and clinical applications.

Related Skills / Surgical Technique

Achievements

- Taiwan International Traditional Chinese Medicine Training Center was established in Linsen Chinese Medicine Kunming Branch, Taipei City Hospital since 2008. We have also cooperated with National Yang-Ming Chao-Tung University, Taiwan International Health Training Center (TIHTC), and other institutes for our foreign training program for Chinese medicine, including acupuncture. We have 20 Chinese medicine doctors specializing in Chinese Internal Medicine, Acupuncture, Chinese Traumatology, Gynecology and Pediatrics. We signed an MOU (Memorandum of Understanding) with São Paulo Medical Acupuncture College (CMAeSP) in 2010, and we had regular exchange programs. Thus far, our program has trained 1764 foreign medical professionals from 80 different countries.

Hualien Tzu Chi Hospital

Traditional Chinese Medicine

Our Traditional Chinese Medicine Department was one of the first in the country to establish a residency program that combines both traditional Chinese and Western medicine. Currently, all the physicians in our department have been trained under this system, making them well-versed in both traditional Chinese and Western medicine. As a result, our department's physicians provide comprehensive care to patients, combining the strengths of both medical traditions. In our outpatient clinic, we can arrange appropriate Western medical tests to establish a diagnosis and then choose the most suitable traditional Chinese medicine treatment for the patient's current condition

**Duration:**

- Course 1: < 3 months, 2 person
- Course 2: 3 months ~1 year, 2 person

**Program fee:**

1. Traditional Chinese Herbal Medicine Knowledge
2. Clinical Knowledge in Traditional Chinese Medicine (TCM) Acupuncture, Tuina (Chinese Therapeutic Massage), Internal Medicine, and Gynecology
3. Academic Discussions on Integrative Medicine Combining Traditional Chinese and Western Medicine

Applicant Qualification

- Qualified Physician, has more than 3 years clinical experiences & more than 1 year working experience

Contact Point

International Medical Center

E-mail: ihsc@tzuchi.com.tw

Achievements

- In the case of inpatient care, when encountering emergencies, rare conditions, challenging cases, or illnesses suitable for traditional Chinese medicine treatment, our hospital's Western medicine physicians also refer patients to our department's physicians for collaborative care, combining both Western and traditional Chinese medicine to better serve the patients. This has allowed us to accumulate extensive experience in the field of integrative medicine for acute and critical conditions, breaking free from the limitations of traditional Chinese medicine in treating only simple and chronic diseases.
- We have trained more than 88 Traditional Chinese Medicine Physician from the Philippines.

Pingtung Christian Hospital

Overseas Global Health Practicum Program

Luke International (LIN) was established and registered in Norway according to the need of health care promotion program for Pingtung Christian Hospital (PTCH). LIN acted as a platform for PTCH to bridge up with the training institute in Malawi and has been running a global health internship and field placement program for medical and public health students since 2011.

Duration:

- Medical Course: 3 weeks~1 month, 4 persons/ per group
- Public Health Course (short): 2 months, 4 persons
- Public Health Course (long): 3 months~1 year, 2 persons

Program fee:

- Total program fee: USD 3,300/ per month
- Mzuzu Central Hospital clerkship cost: US\$100/ per person
- Registration fee for Malawi Medical Council: US\$150/ per person
- E-visa fee: US\$50/ per person (single entry)
- Air ticket: US\$2,000 (Prices may vary depending on the season.)
- Airport pickup fee: US\$200/ per trip
- Accommodation: (Option 1) with breakfast: US\$20/ per day
- (Option 2) with breakfast, lunch and dinner: US\$35/ per day

Accommodation:

- Included in program fee already

Meals & other information:

- Pickup and transfer: US\$5/ per trip
- (from dorm to Mzuzu Central Hospital)

Program Details

Study Objective

1. Acquire knowledge, experience, and a global perspective on career development in the healthcare field
2. Gain field clinical experience on tropical diseases and health cares in resource-constrained environments
3. Develop leadership skills of global health development and international health affairs

Related Skills / Surgical Technique

1. Global health development project initiation and execution skill
2. Cross-culture working and communication skill
3. Tropical diseases care and treatment clinical skill (for medical interns)

Applicant Qualification

- At least three-year health related undergraduate program training (medicine, public health, nursing, epidemiology, health informatics).
- The program requires at least 3 weeks of field training in Malawi. The culture sensitivity and language ability are desirable.

Contact Point

International Medical Mission Department

Name: Ms. Ann Su
E-mail: 05284@ptch.org.tw
Tel: +886-8-7368-686 ext.2740

Achievements

- The OGHP program has enrolled many medical interns, public health graduates and undergraduate students from National Taiwan University and National Yang Ming University since 2011. International universities are also participating the OGHP program through LIN's partnership. Our partner universities include universities from Norway, USA, UK and Japan.
- The OGHP program was selected as a case for Good Practice in Global Health Practicum and recommended by APRU. (<https://doi.org/10.1007/s10900-017-0439-z>)
- The OGHP program has trained over 150 interns/ students from local and international universities.

Camillians Saint Mary's Hospital Luodong

Physical Therapy academic clinical skills

**Duration:**

- Course 1: < 1 month for 2 persons
- Course 2: 3M~1year for 1 person

**Program fee:**

- Course: NTD 2000 / day/ person

**Accommodation:**

- Other: Can help book an affordable dorm.

**Meals & other information:**

- None

Program Details

Study Objective

Learning objectives

1. Special treatment skills for sports injury
2. Treatment skills for neurological disorders

Related Skills / Surgical Technique

Essential techniques to learn:

1. Suspension training
2. Insole measurement technique
3. Stretching therapy and manual therapy technique

Applicant Qualification

- Requirements of trainees:
- Graduated from the physical therapy department

Contact Point

Physical Therapy Office

Name: Ms. Su

E-mail:tina12081119@gmail.com

Tel: +886-3-9544106*8210

Achievements

- In our department, we have 13 well-experienced staff with an average experience of over 15 years in clinical training. We are dedicated to improving our treatment skills and providing multiple therapy choices, making us well-known. We have multiple therapy techniques that enrich our therapist professionals in different areas, which also brings us high efficiency in our clinical therapy program and doing clinical research. We haven't accepted training applications yet so far but we looking forward to your further engagement.

Camillians Saint Mary's Hospital Luodong

Training program of CNA for Dementia Care Service

Duration:

– Course: 10 days/ 4person

Accommodation:

– Other: Can provide assistance in booking an affordable dorm.

Program fee:

– Course: 20,000 NTD/ course

Meals & other information:

– None

Program Details

Study Objective

Learning objectives:

1. To know the workplace of dementia care.
2. To know the disease characteristics of the demented people.
3. To know how to interact and communicate with the demented people

Related Skills / Surgical Technique

Essential techniques to learn:

1. Basic level: having individual interaction with the elderly.
2. Advanced level: undergoing group activities with the elderly.
3. Premium level: providing individualized care to the elderly.

Applicant Qualification

- Senior high school or above
- Those who are interested in dementia caring service

Contact Point

Department: Department of Long-term care

Contact Person: Ms. Zhu

E-mail: smh08050@smh.org.tw

Tel: +886-3-9698-132

Achievements

- Taiwan has proceeded to an “aged society” in March 2018. The elderly population in Taiwan is estimated to exceed 20% by 2026, and Taiwan will be listed in the “super-aged society” along with Japan, South Korea, Singapore and some European countries.
- With the aging of the population, the proportion of the demented population is increasing.
- A national survey conducted by the Taiwan Dementia Association, which is entrusted by the Ministry of Health and Welfare of Taiwan, found that the prevalence of dementia among people over 65 years old is 8%.
- The population of dementia exceeds 300,000 at present and is estimated to reach 850,000 in 2061.
- Concerning the urgent need for the care of dementia, Saint Mary’s Hospital Luodong established a dementia care center in 2017, which provides five main services:
 1. Medical services: one-stop service for dementia diagnosis.
 2. Care consultation: identifying family care needs and providing response skills.
 3. Community service stations: conducting training courses on delaying progression of dementia
 4. Family support: assisting family members to check their status, and sharing care methods through team communication.
 5. Personnel training: enhancing the knowledge of professionals and caregivers about disease care, spreading the knowledge about the dementia of the general public to build a dementia-friendly community.
- To date, the dementia care center has served 1640 demented people, trained 468 professionals, and conducted 78 education courses approaching 3,849 people in the community.

Mackay Memorial Hospital

International Dermatopathology Training Program

The program is the first International Committee for Dermatopathology (ICDP)-accredited dermatopathology training center in Asia. The program director, Dr. Yu-Hung Wu, is the founder and the 1st president of Asian Society of Dermatopathology from 2018-2022.

Duration:

- Training period (months to 1 year)
- Total number: up to 6 trainees
- Can start the training any time

Program fee:

- Tuition fee: NTD\$10,000/month

Accommodation:

- Additional fee, NTD\$5,000/month (provided by Taiwan International Healthcare Training Center, TIHTC)

Meals & other information:

- None

Program Details

Study Objective

1. Diagnose skin disease pathologically
2. Familiar with different diagnostic tools in dermatopathology
3. Learn appropriate clinic-pathological correlation
4. Capable to present and conduct research

Related Skills / Surgical Technique

1. Approach skin pathology slides
2. Interpret chemical and immunochemical stains
3. Capable to read or evaluate immunofluorescence, electron microscope, and molecular diagnosis

Applicant Qualification

- Dermatology or pathology (Resident or board-certified)
- English speaking

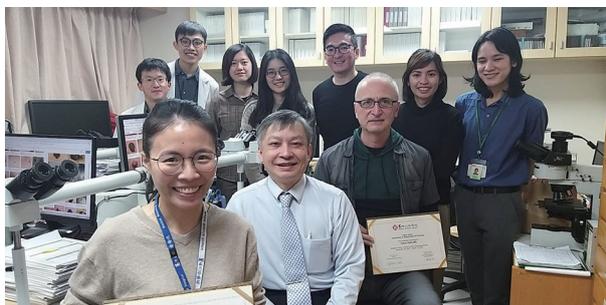

Contact Point

Department of Dermatology

Dr. Yu-Hung Wu
yuhung_wu@yahoo.com

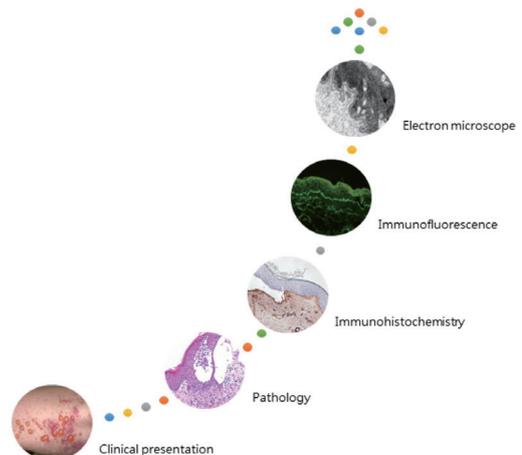

Department of Medical Education

Ms. Mei-Chun Chen
mmhedu@mmh.org.tw

Achievements

- The program provides a comprehensive clinical-pathological training in the skin diseases and more than 5,000 teaching slides in a well-organized system for self-learning. The training includes H&E slide, chemical stain, immunohistochemical stain, immunofluorescence, electron microscopy, and molecular diagnosis in skin pathology.
- There is 37 SCI peer-reviewed journal articles published in recent 5 years (2018 to 2022), including 22 original articles and 15 case reports.
- We have trained 29 international scholars from 15 countries including Asia (25), South America (2), and North America (1), Africa (1) since 2012.

International Dermatopathology Fellowship Training

Mackay Memorial Hospital, Taipei, Taiwan
Joint training program with
Asian Academy of Dermatology & Venereology &
Asian Society of Dermatopathology
Accredited by International Committee for Dermatopathology

Taipei City Psychiatric Center (Taipei City Hospital, Song-De Branch)

Addiction Medicine Program

**Duration:**

– 1-3 months, 1 persons

**Accommodation:**

– None

**Program fee:**

– Physician: NTD 7,500/ Week

– Residents: NTD 5,000/ Week

Program Details

1. The basic science and core concepts of addiction, including the neurobiology of addiction, and the professional assessment of problems related to alcohol and substance use disorder.
2. The pharmacological treatment for alcohol and substance use disorder, including intoxication, withdrawal, and maintenance treatment
3. The psychosocial interventions for alcohol/ substance and behavioral addiction, including motivational enhancement therapy, brief advice, supportive-expressive therapy, the relapse prevention and coping skills therapies (cognitive-behavioral approaches), community reinforcement approach, contingency management, individual drug counseling, and group therapies.
4. Learning the know-hows of conducting addiction research

Applicant Qualification

- A medical degree and license
- At least senior psychiatry residency or fellowship in psychiatry
- Adequate knowledge of the Chinese language. (at least capable of Chinese listening comprehension)

Contact Point

International Affairs , Taipei City Hospital

Name: Ms. Hsu

E-mail: visit@tpech.gov.tw

Tel: +886-2-2555-3000

Achievements

- Taipei City Psychiatric Center (TCPC) is located in the heart of the Taipei City, which serves as the most important psychiatric teaching hospital in Taiwan. TCPC trains more than half of the addiction psychiatrists in Taiwan every year. The Department of Addiction Sciences (DAS) provides treatment for a wide range of addictive disorders, encompassing substance addiction (alcohol and legal and illicit drugs) and behavior addiction (gambling and gaming). The multidisciplinary team of the DAS comprises of psychiatrists, nurses, psychologists, social workers, occupational therapists, pharmacists, and case managers. The director of the Addiction Medicine Program is the chief of the DAS, Dr. Ming-Chi, Huang, who involves vigorously in the teaching of addiction sciences and psychopharmacology for medical students and psychiatric residents/ fellows. She is the Professor of the Department of Psychiatry, School of Medicine, Taipei Medical University, and is also currently the councilor of AsCNP (Asian College of Neuropsychopharmacology) and executive committee member of CINP (The International College of Neuropsychopharmacology).
- TCPC founded the first addiction inpatient ward in Taiwan. We provide inpatient and outpatient treatment, as well as 24-hr emergency service. The DAS has established medical-legal joint intervention programs and has the largest number of patients referred from the judiciary system for alcohol and substance use disorder in Taipei. We also established the first outpatient treatment for gambling disorder in Taiwan. In addition, the DAS is constantly granted by government to do research in addiction-related issues, including biomarkers, childhood trauma, neuroimaging, and brain stimulation.
- Taipei City Psychiatric Center produces more than 40 scientific papers in various peer-reviewed (including SCI) journals every year.

Taichung Tzuchi Hospital

Interventional Pain Management

This is a pain management team focusing on image-guided diagnosis and interventional procedures for chronic pain syndromes. As one of crucial divisions in “Minimally Invasive Spine and Joint Center,” our team is also one of the pivots in “multidisciplinary pain care,” which involves rehab, exercise therapy and minimal invasive surgery provided by other members in the center.

**Duration:**

– The duration could be individualized for the trainees.
Maximal 3 trainees at the same time.

**Program fee:**

– NTD 18,000/month

**Accommodation:**

– Our hospital provides single dorm for each trainee.
The dormitory fee is included in the training fee.

**Meals & other information:**

– N/A

Program Details

Study Objective

1. Chronic pain evaluation and diagnosis
2. Anatomy details of interventional techniques.
3. Patient selection and indications of interventional procedures.
4. Decision making in complicated pain patients.

Related Skills / Surgical Technique

1. Head and neck interventions
2. Disc procedures, cervical, lumbar and thoracic
3. Lumbar spine interventions

Applicant Qualification

- Completed residency of chronic pain associated specialties (e.g. anesthesiology, PM & R)

Contact Point

Department of Pain Management

Name: Dr. Donald TY Tang
E-mail: b92401096@gmail.com
Tel: +886-4-36060666

Achievements

- Outpatient numbers: 200-300 per month
- Interventional techniques: 80-100 ultrasound guided intervention, 30-50 fluoroscopy guided intervention per month.
- Several publications and textbook chapters in interventional pain management
- March. 2023, 2nd year pain fellow observorship from Siriraj Hospital, Mahidol University, Bangkok, Thailand
- Oct. 2023, Observorship from Roi-Et Hospital, Roi-Et, Thailand

Chang Bing Show Chwan Memorial Hospital

Hospital Management & Performance Evaluation Management

Our hospital is known for awesome medical and administrative teams. With the reputation, medical personnel at home and abroad come to our hospital for attending training courses, internship and on-job training.

Duration:

– At least a week/ 1-5 people

Accommodation:

– NT\$4,000/ a month (Dorm)

Program fee:

– Depending on the duration

Meals & other information:

– Not included

Program Details

Study Objective

1. To explore the current environment of Taiwanese hospitals
2. To understand what the NHI system is
3. To introduce various management information systems
4. To learn the tools of the performance evaluation management
5. To reinforce the relationship of hospitals and customers

Related Skills / Surgical Technique

1. The application of HBSC
2. Teaching, researching and clinical indicators.
3. Management Information System

Applicant Qualification

- Doctors, nurses or administrators with more than 3-year related experiences

Contact Point

Chang Bing Show Chwan Memorial Hospital

Name: Teresa Tsai

E-mail: showteresa@gmail.com

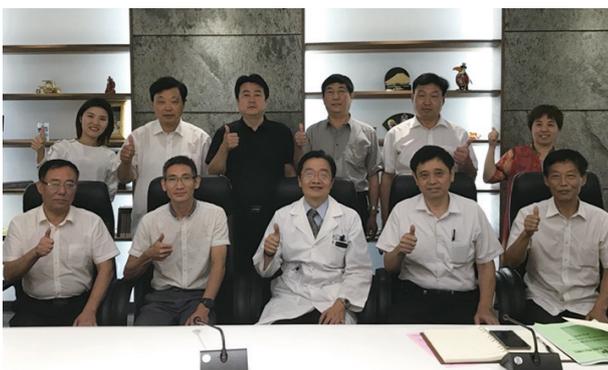

TEL: +886-4-7813888

Website: <https://www.scmh.org.tw/internet/blog/Default.aspx?blog=Q0JfSU1DRU4=>

Achievements

- Every year, medical personnel worldwide attended training courses in our hospital. Therefore, we have a lot of experience in training the staff of every department.
- Until now, we have trained 2,500 participants from 136 hospitals.

Hualien Tzu Chi Hospital

Bone Marrow Transplantation

Since the year 2002, our undergraduate program has been developing bone marrow transplantation procedures, following the model established by the Bone Marrow Transplantation Team at the Fred Hutchinson Cancer Research Center in Seattle, USA. Our team consists of physicians, nurses, dietitians, clinical pharmacists, and social workers who collectively conduct ward rounds to care for patients, providing a more comprehensive and compassionate approach to bone marrow transplantation care.

**Duration:**

- Course 1: < 3 months, 2 person
- Course 2: 3 months ~1 year, 2 person

**Program fee:**

- NTD 5,000/day

**Accommodation:**

- Additional fee, 1,000 / day (including 3 meals)

Program Details

Study Objective

1. Hematology Specialist Knowledge, including Hematologic Malignancies, Benign Hematologic Disorders, Coagulation Disorders, Hematopathology, Blood Banking Operations, and more.
2. Techniques Related to Hematopoietic Stem Cell Transplantation, including Autologous Transplantation, Allogeneic Transplantation, Umbilical Cord Blood Transplantation, Non-relative Transplantation, Haploidentical Transplantation, and Car-T Cell Therapy, among others

Applicant Qualification

- Qualified Physician, has more than 3 years clinical experiences & more than 1 year working experience

Contact Point

International Medical Center

E-mail: ihsc@tzuchi.com.tw

Achievements

- We have successfully conducted bone marrow transplantation treatments for both local and international patients, and we also performed the first CAR-T therapy this year.
- We have trained more than 133 physician from all over the world, either online or on-site courses.

National Cheng Kung University Hospital

Medical Personnel Exchange Program

National Cheng Kung University Hospital (NCKUH) is a national hospital and was established in 1980 and formally opened to the public on June 12, 1988. We provide medical, educational and research services showing excellent achievement. NCKUH is accredited to be the model of excellent operation in Taiwan that other medical centers can learn from.

Duration:

- Course 1: < 1 months/ 2 person
- Course 2: 3-6 months/ 1 person

Program fee:

- Doctor (< 3 months): NTD 6,000-10,000/month
- Nurse (< 3 months): NTD 10,000-12,000/month
- Others (< 3 months): NTD 5,000/month
- Doctor (> 3 months): NTD 6,000-8,000/month
- Nurse (> 3 months): NTD 12,000/month
- Others(> 3 months): NTD 4,000/month

Accommodation:

- Additional fee, NTD 1,280 / day
- Duration depending on the reception of each department
- Not including meal

Program Details

Study Objective

1. Holistic Care
2. Skills of teaching and assessment
3. Enhance inter-professional education and practice

Related Skills / Surgical Technique

1. Clinical Technique (depends on the preceptees' specialties)

Applicant Qualification

- Has license of medical personnel.
- Has more than 1 year clinical experiences & more than 1 year working experience.
- Fluent English

Contact Point

International Medical Center

E-mail: inter@mail.hosp.ncku.edu.tw

Tel: +886-6-2353535 ext 3921-3923

Website: <https://www.hosp.ncku.edu.tw>

Achievements

- Number of surgical procedures is 33,681. Total number of patients undergoing organ or tissue transplantation is 88. Total number of Featured surgeries is 7,854 (Endoscopic surgery 6,944, Da Vinci Surgical System 229, Hybrid Percutaneous Coronary Intervention 647, TAVI 34) .
- The NCKU Hospital published a total 799 SCI theses, with an average impact factor of 7.12. Number of research programs in 2022 reached 528 (Internal 320, External 208).
- In terms of clinical teaching and training, we provide year-round and short-term trainings for 91 trainees from Taiwan and other countries in 2022 (Doctors 18, Medical Professional 73). We also trained 2,562 medical personnel, many of which were student interns from abroad (Domestic 2,092, International 73, PGY learners 397).

Chi Mei Medical Center

Radiation Therapy Clinical School

The course content is provided by a multi-disciplinary team from Chi Mei Medical Center's department of Radiation Oncology, which includes subspecialty, radiation oncologists, and medical physicists. Our treatment machines include TrueBeam (with HyperArc and RapidArc techniques), and Tomotherapy.

Radiation Therapy Clinical School is a complete clinical training program that provides in-depth knowledge for the clinical applications for radiation therapy, especially in SRS/SBRT.

Duration:
– 4 weeks, 2 person

Program fee:
– NTD 25,000/month

Accommodation:
– None

Program Details

Study Objective

1. Brain lesions: including primary benign & malignant tumors, such as meningioma, pituitary adenoma, arteriovenous malformations, trigeminal neuralgia, and multiple brain metastasis
2. Head & neck cancer: for primary and recurrent treatment
3. Thoracic lesions: SBRT for primary non-small cell lung cancer or metastatic lung disease
4. Upper GI lesions: primary and metastatic liver cancer
5. GU lesions: SBRT for localized prostate cancer

Related Skills / Surgical Technique

SRS/SBRT techniques

1. HyperArc
2. Tomotherapy

Applicant Qualification

- Recommended For:
The qualified Radiation Oncologists, Medical Physicists, and Medical dosimetrists who have interest in SRS/SBRT treatment.
- Language: English, or Mandarin

Contact Point

Department of Radiation Oncology, Chi Mei Medical Center, Tainan, Taiwan

Name: Sheng-Yow Ho

Tel: 886-6-2812811ext.53501

Achievements

- We have trained family medical doctor from Universitas Airlangga Indonesia in Aug. to Oct. 2022.
- Nutrition care process including courses in medicine, surgery, gynecology, pediatrics, cancer, critical care and community nutrition.
- We have one technology transferred food, a nutrition space package food for poor chewing and dysphagia elderly person and public listed.

En Chu Kong Hospital

Updated emergency skills program

En Chu Kong hospital is a community hospital where provide 24 hours a day, 7 days a week, continuing emergent service. We had 14 emergency physicians.

Duration:

– Course: 1 month, 1 person

Accommodation:

– Additional fee, NTD 1,000 /month

Program fee:

– NTD 20,000/month

Meals & other information:

– none

Program Details

Study Objective

1. Basic skills of emergency department.
2. Advance skills of emergency department.
3. Updated skill of emergency department.

Related Skills / Surgical Technique

1. POCUS applied at emergency department
2. Clinic pathway of acute stroke and acute coronary syndrome
3. Resuscitation program in emergency department

Applicant Qualification

- Participants should have 2 years clinic experience.

Contact Point

Department of Emergency medicine

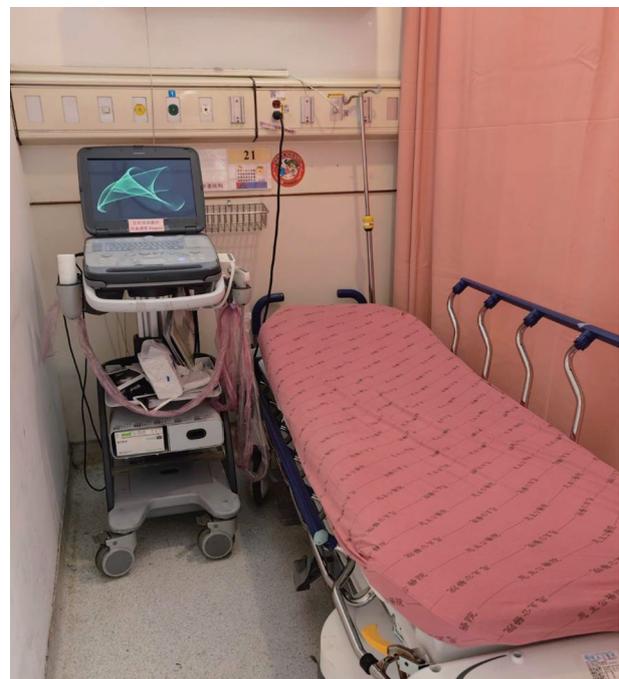

Name: Ya-ling Huang

E-mail: 11207@km.eck.org.tw

Tel: +886-2-26723456 ext 6119

Achievements

- Our emergency department had 50000 visits per year.

En Chu Kong Hospital

Fracture Liaison Service Training Program

The En Chu Kong Hospital Fracture Liaison Service Team is a multidisciplinary group. Older individuals with hip fractures receive integrative care to reduce the risks of recurrent falls, fracture incidence, and mortality rate.

Duration:
– 1 month, 2 persons

Program fee:
– NTD 20,000 / month for every trainee

Accommodation:
– Dormitory is available for rent (NTD 1,000/month)

Program Details

Study Objective

1. To provide a structure for assessment and management of fragility fracture patients
2. To construct a multidisciplinary team for Fracture Liaison Service
3. To learn the Capture the Fracture® Map of Best Practice

Related Skills / Surgical Technique

1. Construct appropriate rehabilitation programs to help coordinate patient care post-fracture
2. Treatments to reduce the risk of osteoporotic fractures
3. Comprehensive geriatric assessment

Applicant Qualification

- The trainee has more than 3 years clinical experiences & more than 1 year working experience

Contact Point

En Chu Kong Hospital
Division of Family Medicine

Name: Dr. Huang

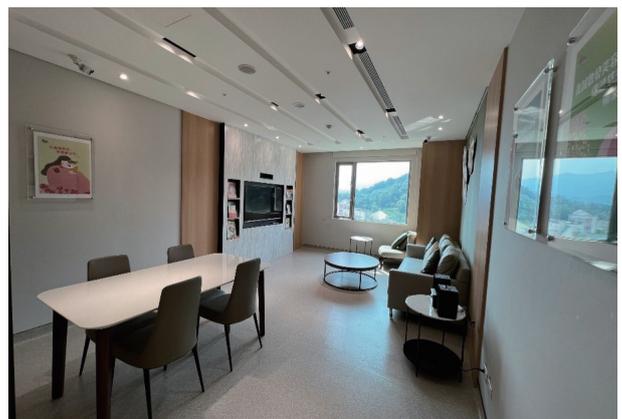

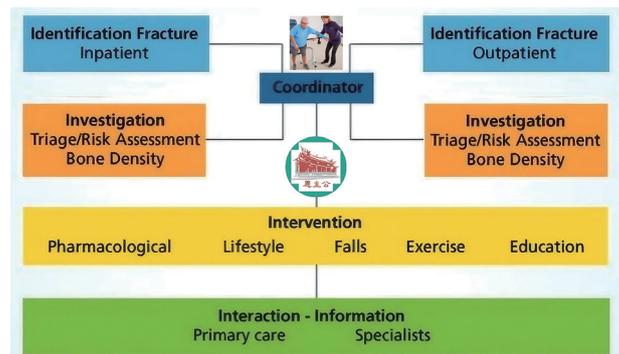

E-mail: 01968@km.eck.org.tw

Tel: +886-2-2672-3456 ext 8706

Website: <https://www.eck.org.tw/en/>

Achievements

- The one-year mortality rate for senior adults with hip fractures following surgery in Taiwan is 14.6%. This program results in an elderly mortality rate of only 4%. The results illustrate the integrated post-surgery intervention administered to older adults with hip fractures by a multidisciplinary medical team.

Kaohsiung Veterans General Hospital

Therapeutic nerve block Training Program

Duration:

– Duration: 1~3 months

Accommodation:

– Other: Application for dorm (limited)

Program fee:

– N/A

Program Details

1. Being a medical center, there are much clinical practice opportunities.
2. Anatomy and echo guided courses provided by our anesthesiologists.
3. Clinical practices are performed under supervision of a pain specialist. A postoperative visit carried out by nursing staff provides immediate feedback for side effects and patient satisfaction.
4. The department currently has 2 ultrasound machines along with ultrasound simulations for practice opportunities to minimize potential risks and maximize precision of the procedure.

Applicant Qualification

- Basic qualifications:
More than 1 year working experience
- Others specifications:
Doctor license and English ability

Contact Point

Department of Medical Research & Education

Ms. Chin-Hsiu Wei

Tel: +886-7-342-2121 #71544

E-mail: chwei@vghks.gov.tw

Achievements

- Therapeutic nerve block (Interventional pain treatment), is done by injecting local anesthetics, steroid or other agents to a desired anatomic region causing the drug to infiltrate the targeted nerve to alleviate pain.
- Caudal block: > 19 cases
- Erector spine plane block: > 25 cases
- Stellate ganglion block: > 5 cases
- Femoral nerve block: > 343 cases

Taipei Municipal Wan Fang Hospital

Surgical Pathology Technician Training Program

We provide a comprehensive training system for pathologist to practice the clinical pathology, and the courses highly meet the standards of a medical center.

As a medical center, we constantly engage to relevant teaching and research in order to improve the quality of pathological diagnosis.

**Duration:**

- 6 months/ 1 person

**Program fee:**

- NTD 60,000/month

**Accommodation:**

- Included in program fee already

**Meals & other information:**

- N/A

Program Details

Study Objective

Grossing of tissue specimens

1. Histopathologic techniques
2. Immunohistochemistry
3. Immunofluorescence

Applicant Qualification

- Clinical Laboratory Science degrees
- Medical technologist license
- Speak English

Contact Point

E-mail: ims@w.tmu.edu.tw

Tel: +886-2-2930-7930 ext.1723-1727

Website: <https://www.wanfang.gov.tw/>

Achievements

- We got the ISO15189 (TAF) laboratory certification in 2020.
- We have trained surgical pathology technicians from all over the world.

Taipei Municipal Wan Fang Hospital

Laboratory Diagnosis

We are the first department passed ISO9002 in this country. We also participated in the American Clinical Pathology Society (CAP) competency test and awarded certificate of conformity every year. In 2006, we passed the ISO15189 (TAF) laboratory certification, in 2007. We passed the US CAP-LAP laboratory certification and became the fourth medical center in Taiwan to pass the CAP certification. In 2015, we continued to pass the CAP laboratory certification and established a medical laboratory that is in line with the international medical organization.

Duration:

– Course: 1~3 months/person

Program fee:

– NTD 60,000 / month

Accommodation:

– Included in program fee already

Meals & other information:

– Teaching in English

Program Details

Study Objective

1. Clinical biochemistry, clinical blood, clinical serum immunity, clinical
2. microscopy, clinical microbiology and transfusion medicine, tuberculosis test

Related Skills / Surgical Technique

1. Lessons
2. Equipment tutorial

Applicant Qualification

- For participant who is qualified with specialist license.

Tel: +886-2-2930-7930 ext.1723-1727

Achievements

- The research team also has a lot of discovery and publishes in gut microbiota and MTB drug – resistance.
- We helped setup MTB Laboratory, especially for planning negative Pressure laboratory and laboratory accreditation with New South Lane Policy in Vietnam.

National Taiwan University Hospital Yunlin Branch

Management of lung cancer

In November 2019, our hospital integrated multiple specialty teams related to pulmonary diseases, combining clinical services, education, and research to formally establish the Thoracic Medicine Center.

Duration:
– Course 1: < 1 months, 1 person

Program fee:
– NTD 21,000/month

Accommodation:
– Need to applicate for dorm
– Additional fee, NTD 4,800 / month

Meals & other information:
– Not included

Program Details

Study Objective

1. Screening of Lung Cancer
2. Assessment and management of lung cancer
3. Interpretation of Lung Cancer studies results.

Related Skills / Surgical Technique

1. electromagnetic navigation bronchoscopy, ENB
2. radial probe(mini) guided biopsy
3. Lung cancer screening

Applicant Qualification

- has more than 3 years clinical experiences & more than 1 year working experience

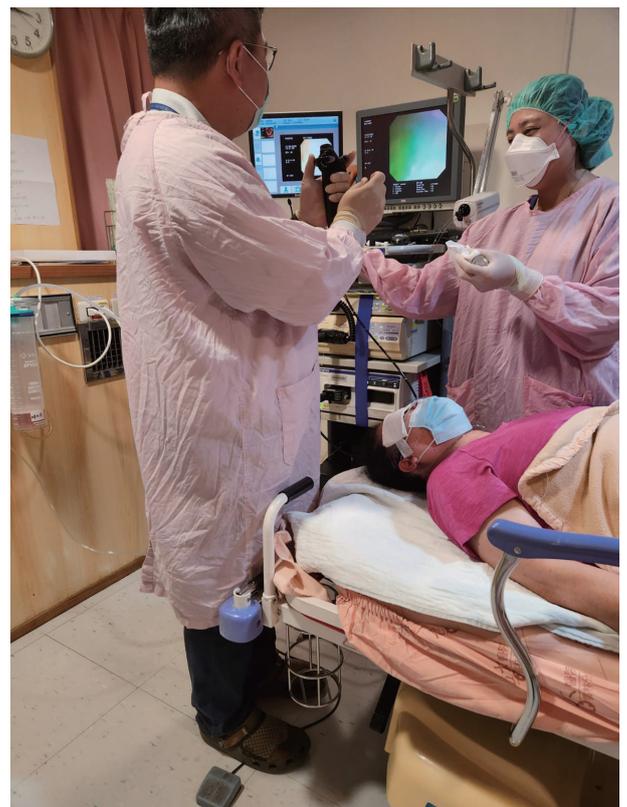

Contact Point

International Medical Service Center

Name: Ms. Meng Hsuan Lin
E-mail: y07971@ms1.ylh.gov.tw
Tel:+886-5-5323911

Achievements

- Our hospital has established a lung cancer patient support group and organizes two patient meetings annually, fostering connections among patients. This initiative enhances the motivation of patients and their treatment. Moreover, we have successfully completed 14 cases of bronchoscopy-guided 3D stereotactic localization procedures and 22 cases of microwave ablation therapy. Currently, our hospital is the only one in Taiwan equipped with electromagnetic navigation bronchoscopy and microwave ablation devices, even in the absence of a Hybrid Operating Room.
- We regularly communicate with doctors from all over the world.

National Taiwan University Hospital Yunlin Branch

Surgical and Medical Managements of Ocular Diseases

The Department of Ophthalmology at the National Taiwan University Hospital Yunlin branch is a specialized medical unit with a team of ophthalmologists who excel in retina, glaucoma, and oculoplasty specialties. Our department offers observer-ship for medical professionals, mainly retina fellows. Trainees here have the opportunity to gain knowledge and experience in managing a wide range of eye diseases and conditions.

Duration:

– 1 month, 1 person

Accommodation:

– Need to apply for dorm
– Additional fee, NTD 4,800 / month

Program fee:

– NTD 21,000/month

Meals & other information:

– Not included

Program Details

Study Objective

1. Surgical managements of retinal disorders including recurrent retinal detachments and proliferative diabetic retinopathy
2. Assessment of assisting device and technology of retinal disorders
3. Interpretation of wide-field OCT studies results.

Related Skills / Surgical Technique

1. Pars plana vitrectomy and membrane peeling
2. Glaucoma related drainage devices

Applicant Qualification

- More than 3 years clinical experiences

Contact Point

International Medical Service Center

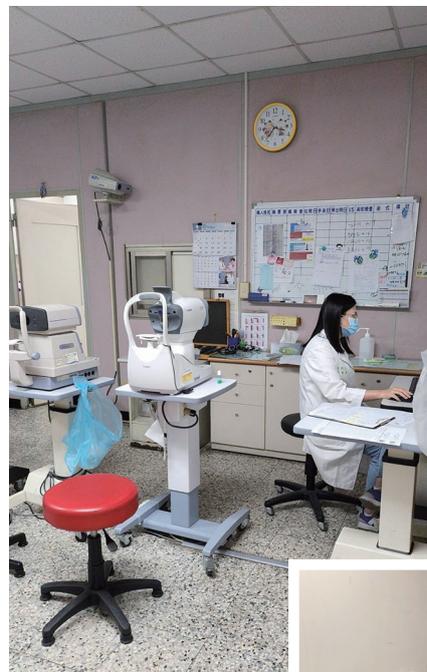

Name: Ms. Meng Hsuan Lin

E-mail: y07971@ms1.ylh.gov.tw

Tel: +886-5-5323911

Achievements

- The Department of Ophthalmology, National Taiwan University Hospital Yunlin Branch has a full range of equipment for evaluation of ocular diseases, including ultrasound, ultra-wide field optical coherence tomography (OCT) and ultrawide field color fundus photography.
- We have already got the training experience of foreign trainee from Indonesia.

National Taiwan University Hospital

ECMO

NTUH ECMO program was started from 1994. We provide a comprehensive and integrated ECMO training program, covering neonatal to adult, and heart to lung.

**Duration:**

– Course: up to 2 year / person

**Program fee:**

– A total of certain amount of tuition fee might be charged based on a standard rate of less than or equal to 10,000 New Taiwan Dollar/per month.

**Accommodation:**

– Accommodation: None

**Meals & other information:**

– None

Program Details

Study Objective

1. ECMO equipment (VA and VV)
2. ECMO patient care (VA and VV)
3. ECPR

Related Skills / Surgical Technique

1. Cannulation (Physician/Surgeon)
2. Circuit priming
3. Daily checking of ECMO patients

Applicant Qualification

- Qualified licenses (medical degree or equivalent) with more than 1-year clinical working experience.

Contact Point

Department of Medical Education

Name: Ms. Chen

E-mail: huiling0602@ntuh.gov.tw

Tel: +886-2-2312-3456 ext. 265612

Achievements

- Up to 2022, NTUH-ECMO team has operated more than 3820 ECMO patients, with 220-250 patients annually in past 5 years, and 40% overall survival rate. Our program also features ECMO-assisted CPR (ECPR), one of the best practice in the world.
- More than 20 papers of ECMO-related issues published in high quality SCI journals from our team in past 30 years, including Lancet, Circulation, JACC, Intensive Care Medicine, Critical Care Medicine, and so on. We have trained 200 foreign medical staffs by work shop and fellowship, including physicians, surgeons, nurses and perfusionists.

China Medical University Hospital

Body Science and Metabolic Disorders International (BMI) Medical Center-Laparoscopic bariatric & metabolic surgery

Duration:

- 3 months, 6 months, 1 year
- At most 4 persons

Accommodation:

- Lodging and meals not included

Program fee:

- NTD 5,000/month

Program Details

Study Objective

1. Bariatric and Metabolic surgery
2. Body contouring surgery
3. Endoscopic bariatric procedures
4. Multidisciplinary team care and coordination
5. Weekly meetings, research, conferences

Applicant Qualification

- Valid Physician/Medical License
- More than one year of working experience

Contact Point

BMI Medical Center

Ms. Sonia Shih
secretary.bmimc@gmail.com

Further information:

<http://www.bmi-medicalcenter.com>

Achievements

- BMI Medical Center is comprised of two sections: Metabolic Medicine and Aesthetics & Wellness, encompassing the elements of weight loss, diabetes surgery, body contouring, and anti-aging medicine.
- Metabolic Medicine offers a variety of surgical procedures to address weight loss and diabetes, including the single-incision laparoscopic gastric bypass, sleeve gastrectomy, and gastric banded plication. Other complex procedures are also available to cater to the patients' individual specific needs such as sleeve gastrectomy with loop duodenojejunal bypass or proximal jejunal bypass.
- Dr. Chih-Kun Huang is closely involved in research and education. He has trained more than 60 international fellows.
- The BMI Medical Center is a high-volume center, with an estimated 400+ cases of bariatric surgery performed each year. The center is a referral center for cases with complications. As an established international healthcare center, we integrate clinical, research, and educational functions. Currently, we are conducting coordinated research with the departments of psychology and family medicine.

Kaohsiung Medical University Hospital

Cancer Therapy: Comprehensive Innovation Therapy of Precision Medicine in Rectal Cancer Patients

Our division of colorectal surgery, established on August 2016, is a multidisciplinary team. We provided a comprehensive therapy for rectal cancer patients to preserve anus in Taiwan.

Duration:

- Course 1: 1 day, 3 persons
- Course 2: 2 days, 3 persons

Program fee:

- Course 1: 500USD per person
- Course 2: 800 USD per person

Accommodation:

- none

Meals & other information:

- Offering lunch

Program Details

Study Objective

1. Strategy-making of perioperative concurrent chemo-radiation therapy
2. Technique of Da vinci robotic rectal cancer surgery.
3. Assessment and supplement of perioperative nutrition for cancer patients.

Related Skills / Surgical Technique

1. Robotic total mesorectal excision
2. Intersphincteric dissection

Applicant Qualification

- has more than 3 years clinical experiences & more than 1 year working experience
- has learned general surgeon or colorectal surgeon surgical technique.
- applicant's profile will be assessed.

Contact Point

Division of Colorectal Surgery

Name: Ching-Wen Huang
E-mail: baseball5824@yahoo.com.tw
Tel: +886-7-3121101-5575

Achievements

- We had conducted 682 cases of Da Vinci robotic rectal cancer surgery. The anal preserving rate was 95%, which is comparable to the major medical centers in the world.
- The research team also has a lot of discovery and has published ninety-two articles on SCI journals since 2016.
- We have trained medical students and surgeons from all over the world.

Shin Kong Wu Ho-Su Memorial Hospital

Pharmacist Training Program

SKH pharmacy department comprises five specialized teams: dispensing, medication information, clinical service, continuing education, and regulatory administration. We operate 24/7 and have designated pharmacists in charge of Total Parenteral Nutrition and Chemotherapy compounding. Pharmacists in all teams intensively cooperate with multidisciplinary healthcare providers on a daily basis.

This pharmacy is reputable for creating highly patient-centered environment: special assistant counter for non-exclusive counseling while private-comfy space serves for longer consultation to satisfy sensitive cases' needs.

Duration:

– Course: 1~2 months/ 2 person

Accommodation:

– Additional fee, NTD 3700/month

Program fee:

– NTD 3,000/day

– NTD 10,000/week

– NTD30,000/month

Program Details

Study Objective

1. Establishing clinical professional skills and practice.
2. Learning drug information and counseling skills.
3. Learning medication administration and quality assurance.

Applicant Qualification

- Has clinical experiences or working experience more than 1 year.

Contact Point

Name: Su Wei, Cheng

E-mail: t005461@gmail.com

Tel: +886-228332211#2165

Achievements

- Quality assurance is maintained and improved by online/paper/instant feedback, through PDCA and the flexibility in our department, we are capable of delivering our best professional service to our people promptly. Review prescriptions at all times; sustain a benevolent relationship with other professions as well as our patients, colleges, and families.
- SKH pharmacy research team has a lot of published in the past 5 years.
- The pharmacy training program that has been trained 4 technicians who work in the Belau National Hospital, and 2 students who study in the Howard University of the United States.

National Taiwan University Cancer Center

Interventional Respiratory Endoscopy Training Program

The Interventional Respiratory Endoscopy Team, established on October 2019, is a multidisciplinary team. The team members include pulmonologists, anesthesiologists, bronchoscopy technicians, anesthetist, and radiographer.

Duration:
– 1 month/ person

Program fee:
– Upon discussion

Accommodation:
– None

Program Details

Study Objective

1. Pre-procedure evaluation
2. Familiar to diagnostic and therapeutic bronchoscopy
3. Specimen process and on-site cytologic evaluation
4. Management of adverse events of respiratory endoscopy

Related Skills / Surgical Technique

1. Interventional bronchoscopy training, including diagnostic and therapeutic bronchoscopy
2. Pleuroscopy training
3. Basic on-site cytology training

Applicant Qualification

- Qualified licenses (medical degree or equivalent) with more than 1-year clinical working experience

Contact Point

Department of Medical Research and Education

Name: Ms. Xiu-Wen Liao

E-mail: A00823@ntucc.gov.tw

Tel: +886-2-23220322 ext. 38328

Achievements

- We have an excellent experience of respiratory endoscopy, with more than 1000 cases in a year. Our diagnostic accuracy of peripheral pulmonary lesions is up to 90% and the diagnostic accuracy is up to 70% when the lesion smaller than 1 cm. We own many bronchoscopic techniques, such as endobronchial ultrasound and navigation system. Our bronchoscopy room also is the first hybrid bronchoscopy room with cone-beam computed tomography in the world.
- We also perform therapeutic bronchoscopy for endobronchial management around 50 case and 30 pleuroscopy annually.
- Our researches include clinical innovative technique and artificial intelligence about interventional pulmonology. We have published 6 SCI papers within 3 years.
- We have trained 10 pulmonologists in Taiwan, and we will start the training program for foreign doctors in 2023.

Taipei Veterans General Hospital

Medical Technologist Training Program

Duration:
– 8 weeks in Mar.~Jun., 12 person.

Accommodation:
– Shared room 3,400 NT/month
– Single room 500 NT/day

Program fee:
– 10,000 NT/month

Meals & other information:
– Employee restaurant: 60 NT/per meal.

Program Details

Study Objective

- Clinical skills in:
 - Clinical microscopy.
 - Clinical hematology
 - Clinical biochemistry.
 - Clinical microbiology.
 - Pathology.
 - Transfusion medicine.

- Each trainee will be assigned to a mentor who is in charge of his/her academic and daily life.
- Trainee in here is working as a staff, following the requirements stated at department and hospital.

Applicant Qualification

- Education and Experience Requirement
- Major in Laboratory science or Biotechnology in Medicine.
- Well-learned the clinical disciplines of the program.

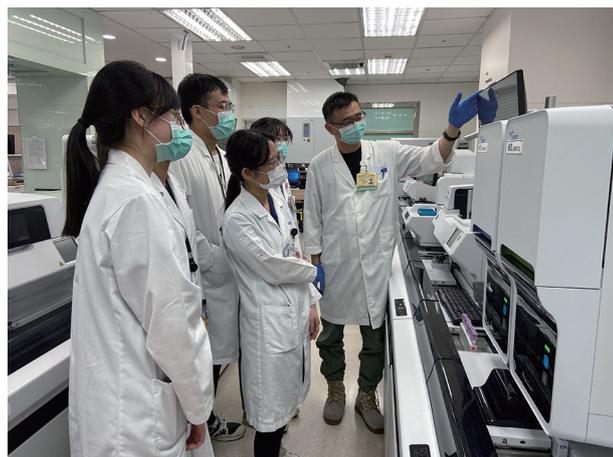

Contact Point

International Medical Technologist Training Center

Name: Ms. Huiszu Tsai

E-mail: hstsai@vghtpe.gov.tw

Tel: +886-2-28712121 ext.83804

Achievements

- Taipei Veterans General Hospital is one of the largest and the best medical center in Taiwan. The laboratory medicine department, CAP accredited since 2003, provides more than 300 examinations with advanced instruments. For better and safer healthcare, we remodeled the central lab into the largest total laboratory automation (TLA) system of Taiwan and introduced phlebotomy tube preparation system in OPD in 2019. In past 20 years, we have trained more than 500 domestic interns and they all successfully perform in the fields of clinical lab, research or biotechnology.
- In the past 5 years, our medical technologists have more than 100 publishes in posters or original articles (SCI/nonSCI) of Clinical microscopy, Clinical hematology, Clinical biochemistry, Clinical microbiology and Molecular pathology.
- We're also experienced in training oversea students. Since 2013, We have trained more than 50 students from all over the world, especially Malaysia and Hong Kong.

National Taiwan University Hospital, Hsin-Chu Branch

Image-guided Procedures of Interventional Pulmonology

Our interventional pulmonology team, established in 2020, performed more than 1000 procedures for lung disease per year. In our hospital, the members in this field include pulmonologists and chest surgeons who can perform advanced diagnosis and treatment. The combination of bronchoscopic, transthoracic, and surgical techniques help achieve the special and integrated features of interventional pulmonology. We accomplished clinical study, animal study, and clinical trial in the field of interventional pulmonology and were awarded the Symbol of National Quality (SNQ) and the National Innovation Award of Taiwan Government.

**Duration:**

– Course: 2 weeks/per person

**Program fee:**

– Course: NTD 4000/week

**Accommodation:**

- Excluded in training fee
- Available to assist dormitory or hotel arrangement
- Meals : meals is excluded in training fee

Program Details

Study Objective

1. Cone-beam CT augmented fluoroscopy guided transbronchial and transthoracic lung biopsy
2. Transbronchial ultrasound-guided lung and lymph node biopsy
3. Transthoracic ultrasound-guided procedures
4. Transbronchial cryobiopsy

Related Skills / Surgical Technique

1. Medical thoracoscopy
2. Percutaneous ablation for lung lesions.
3. Rapid on site examination (ROSE)

Applicant Qualification

- More than one year of clinical experience in chest medicine.
- Basic training or knowledge in interventional pulmonology procedures.

Contact Point

Center for International Health

Name: Ms. Lee Tai Jen

E-mail: g04890@hch.gov.tw

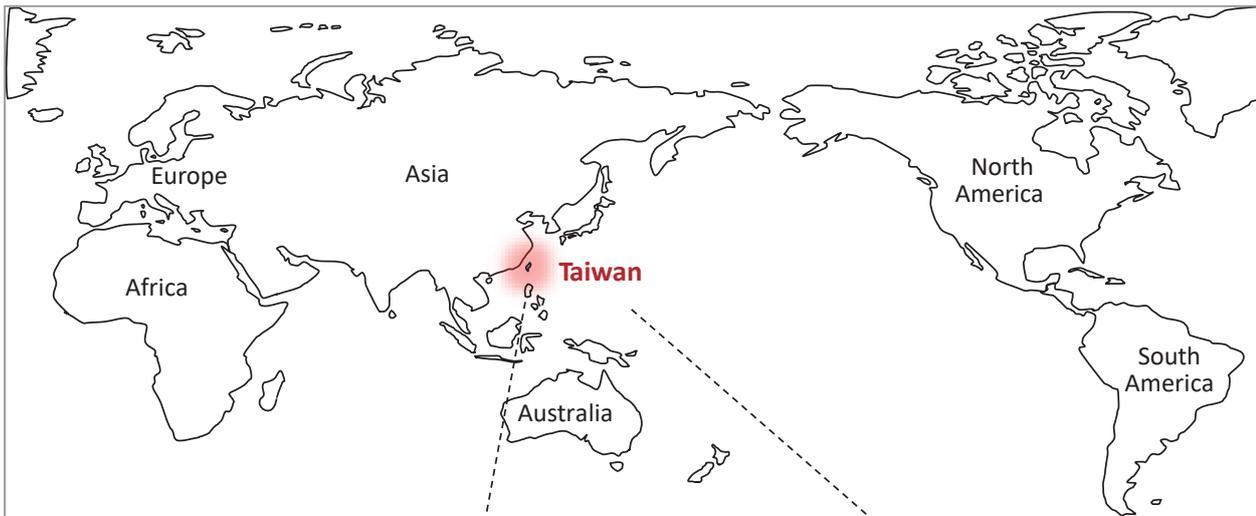

Tel: +886-3-5205604#8883

Website: <https://www.hch.gov.tw/english/>

Achievements

- The success rate was 99% for preoperative transbronchial localization of small lung lesions.
- We can perform “one-stage” procedure for the diagnosis and treatment for lung lesions in a single suite.
- More than 10 research papers focusing on the issues of interventional pulmonology.
